## Forward-Looking Statements

This communication contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. When used in this presentation, the words “plan,” “target,” “anticipate,” “believe,” “estimate,” “intend,” “potential,” “will” and “expect” and similar expressions are intended to identify such forward-looking statements. Any express or implied statements contained in this announcement that are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation: our expectations regarding the drilling to be completed in 2024 and 2025; our expectations for the improvement and growth of the mineral resources; the high grade potential of the drilling completed after the effective date of the Initial Assessment; and the timing for an updated S-K assessment to be released in 2025. These forward-looking statements are based on assumptions and expectations that may not be realized and are inherently subject to numerous risks and uncertainties, which could cause actual results to differ materially from these statements. These risks and uncertainties include, among others: the execution and timing of our planned exploration activities; our use and evaluation of historic data; our ability to achieve our strategic goals; the state of the economy and financial markets generally and the effect on our industry; and the market for our common stock. The foregoing list is not exhaustive. For additional information regarding factors that may cause actual results to differ materially from those indicated in our forward-looking statements, we refer you to the risk factors included in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2023, as updated by annual, quarterly and current reports that we file with the SEC, which are available at [www.sec.gov](http://www.sec.gov). We caution investors not to place undue reliance on the forward-looking statements contained in this communication. These statements speak only as of the date of this communication, and we undertake no obligation to update or revise these statements, whether as a result of new information, future events.

## Richmond Hill Gold Project

- 2,749 mineral acres
- Private land
- Shallow mineralization: oxide, mix and hypogene
- S-K 1300 Maiden Resource  
1.33 M oz of Indicated Gold  
1.13 M oz of Inferred Gold

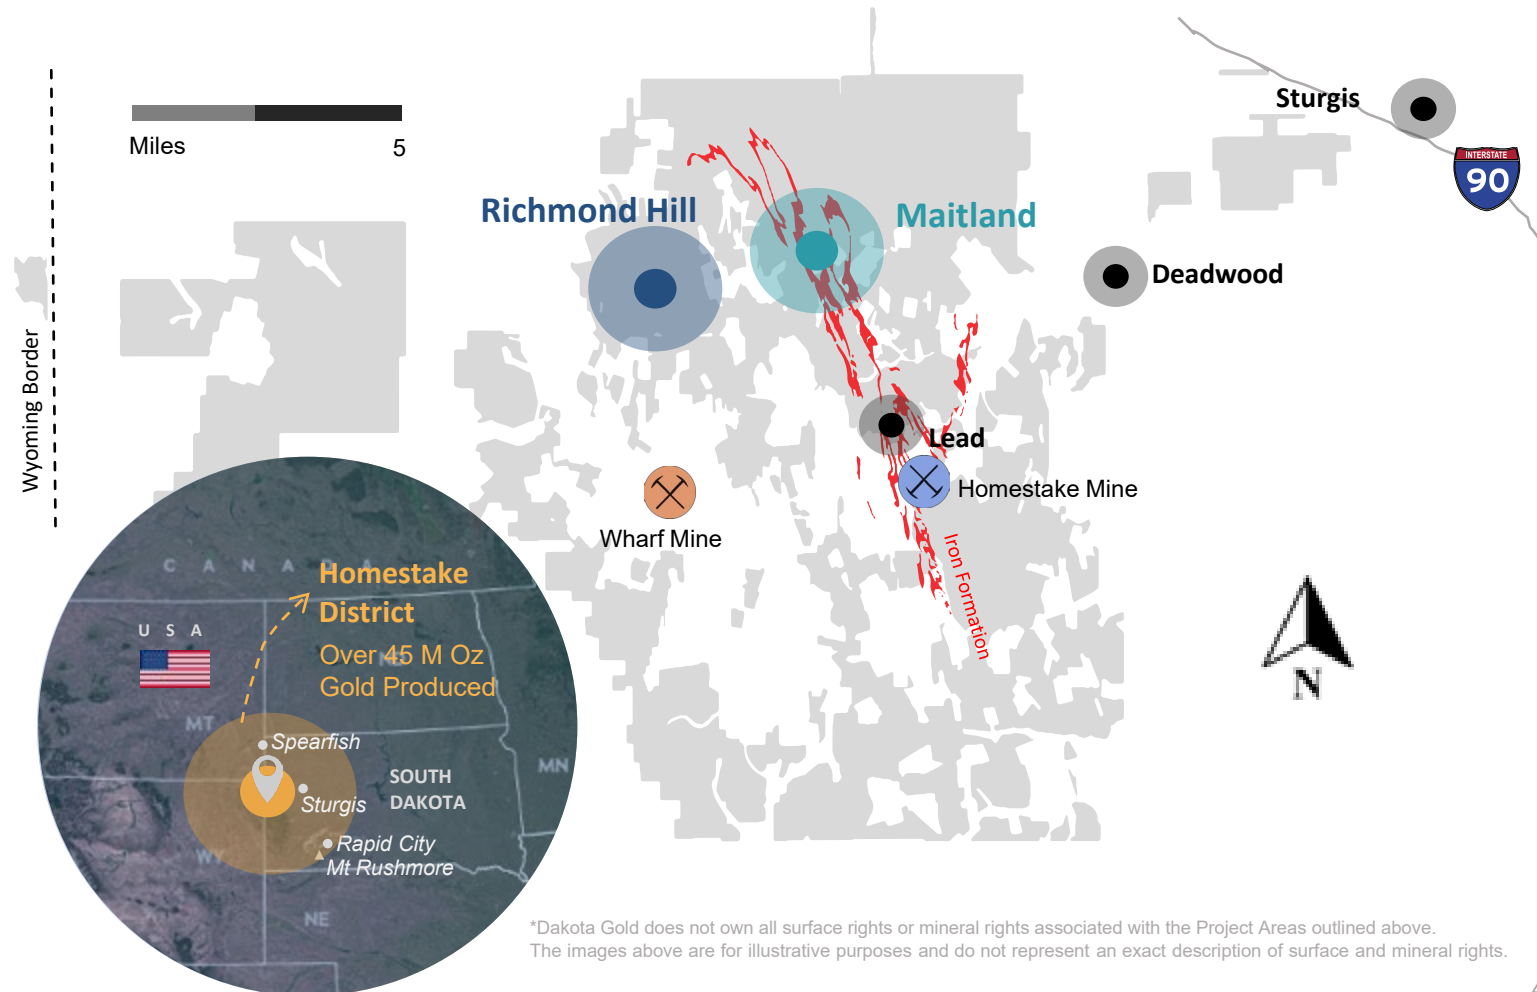

## Maitland Gold Project

- 2,112 mineral acres of private land contiguous with Homestake Mine
- Unionville Zone shallow Tertiary epithermal gold mineralization
- JB Gold Zone deeper Homestake Mine-style gold mineralization (iron formation)

### Drill Hole MA24C-038

James Berry  
Vice President  
Exploration

*"Based on my experience working in the Homestake Mine, at Maitland we have intersected higher grade mineralization that is shallower than exploration results from the upper portion of the West Ledge system at Homestake, which ultimately produced more than 6 million ounces of gold."*

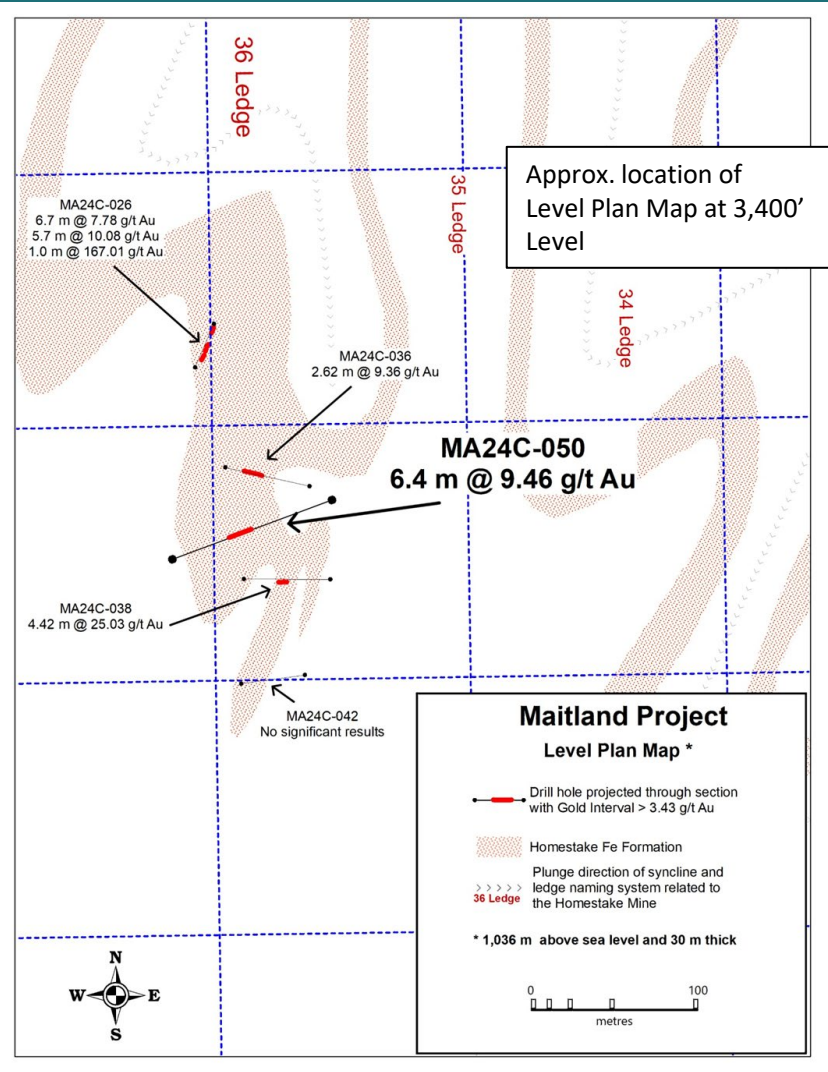

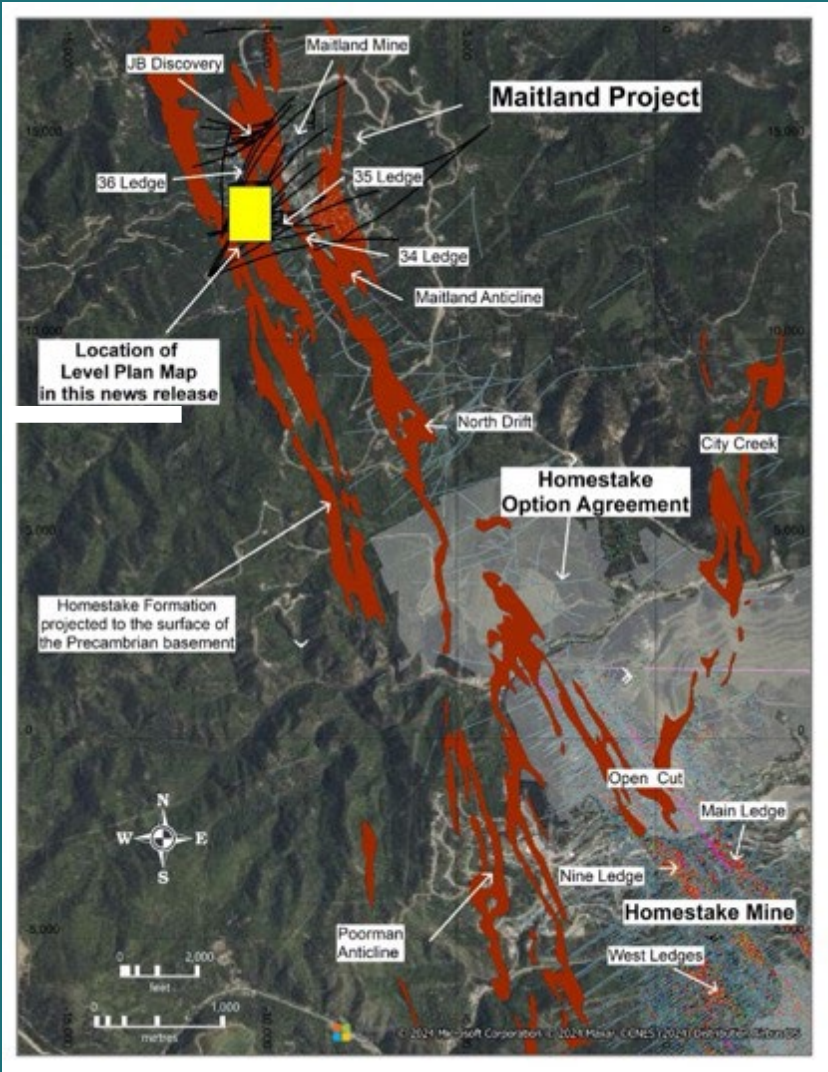

- The growing array of drill holes targeting Homestake Mine-style gold mineralization has now produced multiple high-grade gold intercepts in at least three distinct ledges within the JB Gold Zone at Maitland: 34 Ledge, 35 Ledge and 36 Ledge.
- Drill hole MA24C-036 returned 9.36 grams/tonne gold over 2.6 meters, and drill hole MA24C-038 returned 25.03 grams/tonne over 4.4 meters. Both holes are located in 36 Ledge on the west side of the Maitland mineralized gold trend and the gold mineralization intersections are shallow at approximately 500 meters below surface.
- Drilling at Maitland is transitioning from wider spacing of approximately 250 meters, to tighter spacing to delineate the ledges now outlined which remain open along strike and to depth.

# Maitland – JB Gold Zone

Three Distinct Ledges of High-Grade Homestake Mine-Style Gold

- The width, grade and stratigraphy of intercepts identified at Maitland are analogous to the gold mineralization found in the “West Ledge” system at the historic Homestake Mine
- The West Ledge system produced approximately 6 million ounces of gold

### Hole MA23C-026

- Highest-Grade Intercept To Date at Maitland 4.871 oz/ton Au over 3.4 feet (167.0 g/t Au over 1.0 meter)
- 14 sample intervals in Homestake Formation with visible gold between 2283.3 and 2539.6 feet and an additional occurrence at 5113 feet in the lower portion of the hole.
- MA23C-026 also intersected 0.037 oz/ton Au over 39.8 feet (1.26 g/t Au over 12.1 meters) in a new Tertiary zone of epithermal gold mineralization in the upper part of the drill hole, located approx. 500 feet west of the Unionville Zone discovery area. This mineralization appears to be in a distinct Tertiary-age structural zone west and parallel to the Unionville Zone.

### Core Comparison To Historic Homestake Mine

- Core photo of MA23C-017 (Dakota Gold) at 2,703 feet (823.9 meters) showing arsenopyrite, pyrite, and pyrrhotite mineralization adjacent to quartz-carbonate veins with chlorite selvages.
- For comparison, a photo of Homestake Mine 7 Ledge ore (2 Moz @ 0.240 oz/ton Au) and Main Ledge ore (19 Moz @ 0.262 oz/ton Au) are also shown.
- The core from MA23C-017 looks more like the mineralization in the Homestake Mine than intercepts at the North Drift.

# Maitland – Unionville Zone

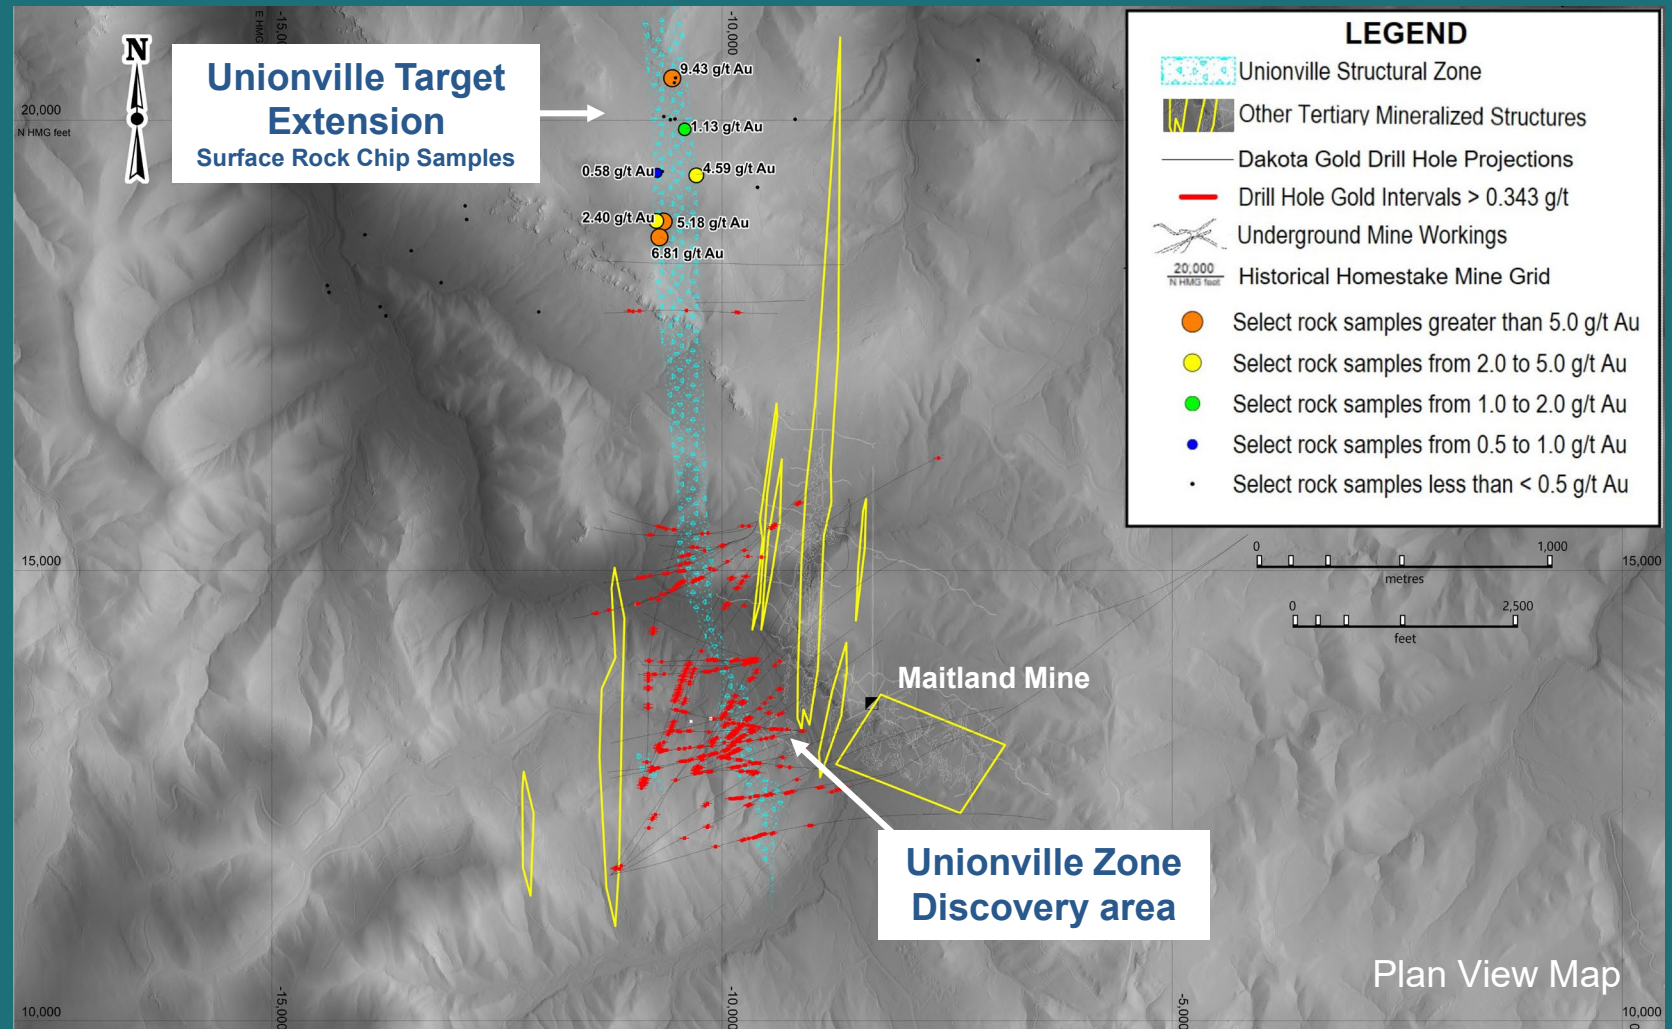

**Unionville Target Extension**  
Strike length could extend to 10,000 ft (3,048 m)  
Open along strike both to the north and south of the discovery zone.

- Tertiary-age, structurally controlled epithermal gold mineralization in repeating fault structures that crosscut all rock types and is often associated with igneous dikes and sills.
- Mineralization extends from the surface and is open at depth.

# Richmond Hill Gold Project - Delivering a Maiden Resource

- Drilling commenced March 2022
- Resource timeline – The **multi-million-ounce** maiden resource was outlined in less than 20 months from Dakota Gold's first drill hole.
- Maiden resource was derived from a historical database containing **69,401 gold assays** from more than **900 drill holes**, including **57 drill holes** from **Dakota Gold's current drill program**.

## Notes:

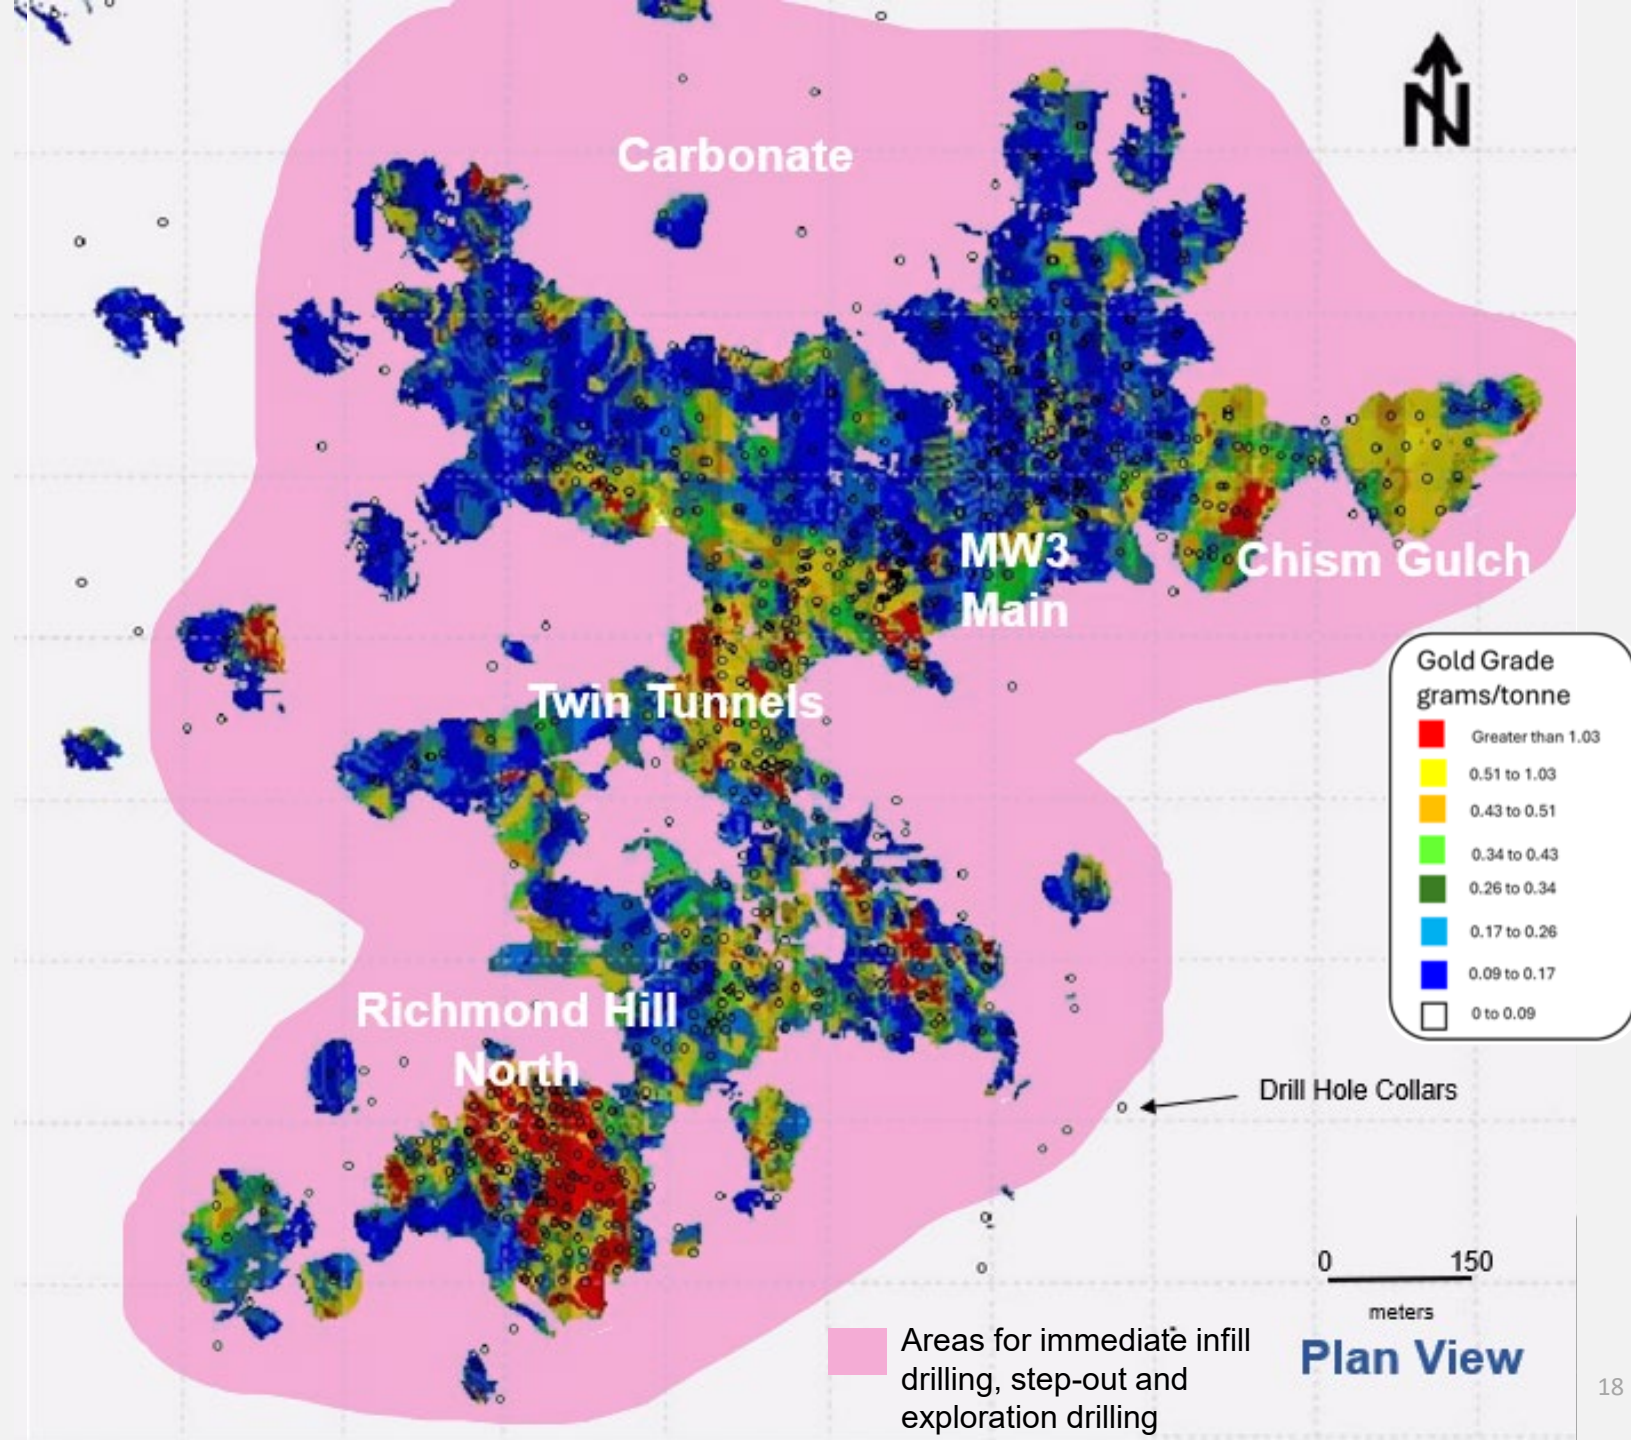

- Mineral resources are not mineral reserves and do not have demonstrated economic viability.
- There is no certainty that all or any part of the estimated mineral resources will be converted into mineral reserves.
- Pit-constrained resources are stated at a range of cutoff gold grades depending on oxide state.
- Oxide recovery = 87%, mixed recovery = 65%, hypogene recovery = 42%.
- Mineral resource tonnage and contained metal have been rounded to reflect the accuracy of the estimate, and numbers may not add due to rounding.
- Mineral resource tonnage and grades are reported as undiluted.
- MRE is current as of October 5, 2023.
- Pit-Constrained at \$1,900/oz; Royalty = 3.8%; Mill & G&A Cost = \$8.00; Mine Cost = \$1.80.
- Cutoff grade Au g/t : Oxide 0.21 g/t, Mixed 0.29 g/t, Hypogene 0.44 g/t
- Pit slope at 50 degrees

# Richmond Hill - Potential Step-Out & Infill Areas

- Only partially tested three of the six known breccia pipes
- Mineralization is very shallow with portions of the resource exposed at surface.
- The resource is constrained by lack of drilling not geology.
- High-grade potential – Drilling completed post S-K 1300 cut off (not included in maiden resource) includes:  
22.9 meters of 1.99 g/t Au;  
42.8 meters of 1.71 g/t Au; and  
60.9 meters of 1.68 g/t Au.

# Richmond Hill - Upside Potential to Grow Resource

**Section 23 of the Initial Assessment identified several opportunities for generating additional resource:**

- Incorporating silver in the mineral resource estimate
- Additional drilling where the deposit limits have not been defined or lacked sufficient drill-hole density
- Additional metallurgical test work to understand the variability and attempt to improve recoveries
- Improving understanding of the geological model with potential to improve metallurgical recoveries

Jonathan Awde  
President and CEO

*"We have been conservative in our methodology for the current resource, and we are confident that the resource will expand in the updated S-K 1300 Assessment targeted for mid-2025."*

SVP & Chief  
Administrative Officer

*"Dakota Gold is committed to sustainable development as a core value, as further articulated in our new Environmental Policy."*

# Sustainability Highlights 2023

## HEALTH AND SAFETY

- **Achieved 3 YEARS with ZERO Lost Time Incidents** (2021 to 2023)
- Voluntarily provided full Mine Safety & Health Administration training to our workforce
- Employed 40 full-time & 2 part-time employees, 4 interns, 10 consultants, and 40 contractors

## ENVIRONMENT

- **ZERO Reportable Environmental Incidents** since commencing drill programs in 2022

## COMMUNITY

- **Over \$59,000 Direct Investments to Local Community** and professional organizations, and educational institutions in South Dakota
- **More than \$26.5 Million Invested in South Dakota** through payroll, payments to vendors and contractors and purchases on land and buildings
- **Hosted 17 Community Engagement Events**

## GOVERNANCE

- Co-Chairs, Steve O'Rourke and Robert Quartermain sit on ESG Committee
- Adopted or updated and made available on our website the following policies
  - Code of Ethics
  - Environmental Policy
  - Community Relations Policy
  - Anticorruption Policy
