

DAKOTA GOLD

Revitalizing The Homestake District Of South Dakota

NYSE American: DC

Investor Presentation | March 2025

dakotagoldcorp.com

Dakota Gold is a South Dakota-based, responsible gold exploration and development company with a specific focus on revitalizing the Homestake District in Lead, South Dakota.

Disclaimer

Forward-Looking Statements

This communication contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. When used in this communication, the words “plan,” “target,” “anticipate,” “believe,” “estimate,” “intend,” “potential,” “will” and “expect” and similar expressions are intended to identify such forward-looking statements. Any express or implied statements contained in this communication that are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation: our expectations regarding additional drilling and modeling; our expectations for the improvement and growth of the mineral resources and potential for conversion of mineral resources into reserves; the timing for the S-K 1300 Initial Assessment with cash flow analysis, completion of a feasibility study, and/or permitting; our expectations regarding free cash flow and future financing, and our overall expectation for the possibility of near-term production at the Richmond Hill project. These forward-looking statements are based on assumptions and expectations that may not be realized and are inherently subject to numerous risks and uncertainties, which could cause actual results to differ materially from these statements. These risks and uncertainties include, among others: the execution and timing of our planned exploration activities; our use and evaluation of historic data; our ability to achieve our strategic goals; the state of the economy and financial markets generally and the effect on our industry; and the market for our common stock. The foregoing list is not exhaustive. For additional information regarding factors that may cause actual results to differ materially from those indicated in our forward-looking statements, we refer you to the risk factors included in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2024, as updated by annual, quarterly and current reports that we file with the SEC, which are available at www.sec.gov. We caution investors not to place undue reliance on the forward-looking statements contained in this communication. These statements speak only as of the date of this communication, and we undertake no obligation to update or revise these statements, whether as a result of new information, future events or otherwise, except as may be required by law. We do not give any assurance that we will achieve our expectations.

All references to “\$” in this communication are to U.S. dollars unless otherwise stated.

Dakota Gold - a unique investment opportunity

1. **Fully funded with \$47 Million cash balance** to advance through the end of the Feasibility Study for Richmond Hill
2. Located in the historic **Homestake Gold District** that **has produced ~45 million ounces of gold** since 1876
3. Our **Richmond Hill and Maitland projects** are located on **Private Land in South Dakota**, a mining state
4. Richmond Hill is the **largest undeveloped gold resource in US advanced by a junior** with a definable pathway to production
5. **Close to existing infrastructure** on previously mined land currently in post-closure management, with state permitting primacy
6. **Development plan as a low-cost heap leach operation** similar to the adjacent profitable gold heap leach Wharf Mine of Coeur Mining
7. **Key management** personnel who **have** worked at the **Homestake and Wharf Mines** bring that **experience** to our development and exploration programs. Local knowledge and experience has significant value for Dakota Gold and its shareholders

Robert Quartermain
Co-Chair, President & CEO

“Over my career in the mining and resource industry, first with Silver Standard Resources (now SSR) and then with Pretium Resources, my focus has been on creating shareholder value through advancing gold and silver exploration projects to production. We have that opportunity with our Richmond Hill and Maitland projects in Dakota Gold”

Homestake District: New Opportunities

Richmond Hill Gold Project

- Private Land
- Over 3,000 mineral acres
- Development stage oxide heap leach gold project
- S-K 1300 Mineral Resource

Heap Leachable:

3.65 M oz M&I Gold
2.61 M oz Inferred Gold

38.1 M oz M&I Silver
22.8 M oz Inferred Silver

Combined Heap Leach & Milled:

4.64 M oz M&I Gold
5.06 M oz Inferred Gold

47.8 M oz M&I Silver
52.1 M oz Inferred Silver

Legend - Homestake District and Key Projects

- Dakota Gold Land Package
- Richmond Hill – Private Land
- 🔴 Homestake Iron Formation
- Richmond Hill resource cone
- 🔵 Wharf open pit mine
- Maitland - Private Land

Maitland Gold Project

- Private Land
- 2,364 mineral acres
- Contiguous with Homestake Mine
- Two Discoveries:
 - JB Gold Zone Homestake Mine-style gold mineralization (iron formation)
 - Average Grade: 10.76 g/t Au over 4.0 meters
 - Unionville Zone shallow Tertiary epithermal gold mineralization
 - Average Grade: 4 g/t Au over 6.4 meters

Richmond Hill Oxide Heap Leach Gold Project

– Developing One of the Next Gold Mines in the USA

New S-K 1300 Mineral Resource

- **Heap Leachable Mineral Resource:**
 - 3.65 M oz of M&I at 0.463 g/t Gold
 - 2.61 M oz of Inferred at 0.353 g/t Gold
 - 38.1 M oz of M&I at 4.83 g/t Silver
 - 22.8 M oz of Inferred at 3.09g/t Silver
- **Combined Heap Leach & Milled Mineral Resource:**
 - 4.64 M oz of M&I at 0.470 g/t Gold
 - 5.06 M oz of Inferred at 0.381 g/t Gold
 - 47.8 M oz of M&I at 4.83 g/t Silver
 - 52.1 M oz of Inferred at 3.91 g/t Silver
- The additional Milled material provides long-term optionality for the Project.
- Updated Initial Assessment with Cash Flow in mid-2025 (Similar to a Canadian PEA)
- Adjacent to the 4 M oz Wharf Mine that generated \$95 million in free cash flow in 2024 from ~98,000 ounces of gold.

Richmond Hill - Potential Step-Out & Infill Areas

- Mineralization is very shallow with portions of the resource exposed at surface.
- The heap leachable resource remains open to the north and in the southeast area of Richmond Hill.
- Both areas are currently in the process of being permitted for 2025 drilling with the goal of expanding the resource with material amenable to heap leaching.
- Additionally, drilling is planned to begin converting resource to reserves and gathering additional metallurgical data.

Wharf Mine Compared to Potential Richmond Hill Study

	Wharf Mine	Richmond Hill (Study Parameters)	R&R Dec 31, 2024	Wharf Mine	Richmond Hill Resource	Richmond Hill Resource @ Wharf Reserve Cut-off
Free Cash Flow	\$94.6 million (12mos Dec)		P&P Reserves	757,000 (0.81 g/t)		
Gold Production	98,042 ounces (12mos Dec)	125-210,000	M&I Resources	1,019,000 (0.53 g/t)	3,653,300 (0.462 g/t)	2,800,000 (0.72g/t)
CAS per ounce	\$934/oz		Inferred Resources	470,000 (0.56 g/t)	2,613,400 (0.363g/t)	1,691,200 (0.611g/t)
Annual Mined	5.0 mt	11.0-18.3mt				
Strip Ratio	2.3	Low				

	Wharf Mine	Richmond Hill
Ownership	100% Coeur Mining	100% Optioned to Dakota Gold
Employees	243 as of Dec 31, 2023	
Claims	7,852 net acres	~3,000 net acres
Type	Open pit and heap leach	Open pit and heap leach
Processing	Crushing, “on-off” heap leaching, spent ore neutralization, carbon absorption/desorption	Crushing, heap leaching, Merrill Crow
Metals	Electrolytic cathodic sludge	Dore gold/silver bar
Mine Life	~6 years	+15 years, production targeted for 2029

Source: Latest available public company information

Production range was calculated by taking, at the low end, 30,000tpd throughput and the resource weighted average grade and recovery for Measured and Indicated and 50,000tpd at the high end. While the Company has not developed a mine plan, it is noted that for the preliminary measured and indicated leachable resource shell, total resource was 249 million tons and total material was 388 million tons.

Richmond Hill - Phase 1 Conceptual Site Plan

- Initial 5 years
- Heap Leachable M&I material
- Target Production Rate: 30k tpd crush/stack rate
- Target Annual Production: ~ 150k to 200k oz gold
- Concurrent reclamation with mining to reduce disturbance footprint
- Feasibility study to optimize mining and processing options within the private property claim footprint

Legend – Dakota Gold Land Package

- Dakota Gold Land Package
- Richmond Hill – Private Land
- Homestake Iron Formation
- Richmond Hill resource cone
- Wharf open pit mine
- Maitland - Private Land

Richmond Hill - Permitting

- **The Project Area is virtually 100% private land** – since the Project is not located on Federal lands, State and Local governments are expected to be the primary permitting entities
- **Previously disturbed land** - Much of the Project Area is currently being managed as a closed mine under an existing permit for open pit mining, providing a wealth of data and experience regarding environmental conditions

Timm Comer
Environmental
Director

“Richmond Hill’s private land position and status as an inactive mine provide a pathway from feasibility through permitting to production financing”

Local Experience and Competencies

James Berry
VP, Exploration

Over 30 years of experience in mining and exploration including 5 years working for Goldcorp at the Wharf Mine, as well as 10 years working for Barrick at the Homestake Mine.

Shawn Campbell
CFO

More than 15 years of experience in project and operations financial management including various roles with Goldcorp including Head of Investor Relations and the Head of Finance for Canada and the U.S. Part of management team at Goldcorp during its sale of the Wharf Mine to Coeur Mining.

Lindsay Chasten
Senior Geologist

15 years of experience working at the Wharf Mine for both Goldcorp and Coeur Mining in production support and exploration including resource modeling, database management and QA/QC.

Ron Everett
Sr. Manager – Business

Mayor of Lead with 47 years of experience in the mining industry including Administration Manager of the Wharf Mine for Goldcorp and Coeur Mining as well as Administration Manager for the Richmond Hill Mine.

Dr. Stephen O'Rourke
Co-Chair, Director
and Managing
Director

"The Homestake District hosts multiple types of gold mineralization as we see present at the historic underground Homestake Mine and at Coeur Mining's operating open pit heap leach Wharf Mine.

Dakota Gold's team benefits from having local experience and competencies in both styles of mining and mineralization in the district. As we advance our Richmond Hill project, we will draw on this direct experience to inform our mine planning and optimization of operations."

Richmond Hill - Timeline to Production

1. See news release Oct 20, 2023 re Orion Mine Finance for details

Richmond Hill - Ready to become one of the next independent US gold mines, in a market with limited assets

Source:
- Latest available public company information as of August 7, 2024
- Dakota Gold is currently evaluating various production scenarios as part of advancing the Initial Assessment with Cash Flow for Richmond Hill. 100,000 oz/yr has been used as an internal assumption in some such scenario planning, but annual production has not yet been evaluated by a Qualified Person.
* Production start date unknown

Company	EV (US\$M)	2025E Prod'n (AuEq koz)	100 kozpa as % of production	EV (US\$M) per 100kozpa
Alamos Gold	\$10,746	605	17%	\$1,776
B2Gold	\$4,621	1,016	10%	\$455
Buenventura	\$2,506	441	23%	\$569
Coeur	\$4,434	664	15%	\$668
Equinox Gold	\$6,523	1,130	9%	\$577
OceanaGold	\$2,196	538	19%	\$408
Orla Mining	\$3,316	326	31%	\$1,018
New Gold	\$2,856	441	23%	\$648
Hecla	\$4,214	370	27%	\$1,138
Evolution Mining	\$9,647	1,018	10%	\$947
Average	\$5,106	655	18%	\$820

Information as of Mar 24, 2025. Production estimates based on BMO Equity Research Models at Street consensus pricing, otherwise based on FactSet estimates.

Orla shown pro forma Musselwhite.
1. Based on pro forma Au production shown in Equinox Gold / Calibre Investor transaction presentation.

Richmond Hill

– Largest undeveloped oxide gold asset in US held by junior

Richmond Hill is a Top Tier Gold Project

- **Large heap leachable gold project**, resource open for expansion
- **Private land package** with state permitting primacy
- **Financial proposal** for development and construction with Orion
- **Potentially lower development and construction costs** due to prime location with existing infrastructure next to headquarters in Lead, SD
- **Initial Assessment with Cash Flow expected mid-2025.** The areas of focus will be where the resource contains higher-grade heap leach material.
- **Path to production**, work will begin to initiate a full feasibility study mid-2025

Remarks from Dakota Gold's analysts on the Richmond Hill oxide resource:

“...Richmond Hill is a meaningful deposit not only in the US but also globally and is entirely on private ground, which should simplify permitting and development.”

Andrew Mikitchook, BMO analyst

“We highlight Richmond Hill is the largest undeveloped oxide gold asset in USA we are aware of that is held by a junior.”

Michael Gray, Agentis analyst

“Less than a year since its initial resource estimate, Dakota's aggressive drilling over 2024 has paid off. While our focus and that of the company is on the heap leach portion of the resource, the total resource is impressive.”

Peter Bell, Canaccord analyst

Maitland Gold Project

– JB Gold / Unionville Zones

- Since commencing exploration in 2022, Dakota Gold has completed 73 drill holes totaling 63,448 meters at Maitland. In 2024, 35 drill holes were completed including 14 daughter holes totaling 25,172 meters.
- JB Gold Zone
 - Three distinct ledges (34, 35, 36) have been discovered at Maitland in the JB Gold Zone.
 - The width, grade and stratigraphy of intercepts identified are analogous to the gold mineralization found in the West Ledge System at the historic Homestake Mine which produced ~6 million ounces of gold.
 - Average grade of the West Ledges was 11.63 g/t Au over an average thickness of 6.1 meters.
Average grade of the JB Gold Zone is 10.76 g/t Au over an average thickness of 4.0 meters.
- Unionville Zone
 - A new tertiary oxide mineralization discovery at Maitland.
Average grade from the 25 drill holes is ~ 4 g/t Au over 6.4 meters

Maitland Gold Project - High-grade exploration optionality

Maitland Gold Project

James Berry
Vice President
Exploration

"The opportunity we see at Maitland is unique in that we have the possibility to access two distinct types of mineralization."

The Homestake Mine and Maitland is Banded Iron Formation, similar to the Musselwhite deposit in Ontario, Canada which contained approximately 6.3 million ounces of gold at a grade of ~6 g/t Au."

LEGEND Showing select intercepts at Maitland

Homestake Mineralization

- 34 Ledge
- 35 Ledge
- 36 Ledge
- 37 Ledge

→ Homestake Intersections
10.76 g/t Au / 4.0 m average

Tertiary Mineralization

- Unionville Zone
- Other Tertiary Targets
- Tertiary Intersections
4 g/t Au / 6.4 m average

The objective of the 2025 drill program will be to join the mineralized areas of the 35 and 36 Ledges

Director and Chief
Operating Officer

"Dakota Gold is committed to sustainable development as a core value, as further articulated in our Environmental and Community Relations Policies."

Dakota Gold is a Responsible Miner

– Sustainability Highlights 2024

HEALTH AND SAFETY

- **Achieved 4 YEARS with ZERO Lost Time Incidents** (2021 to 2024)
- Voluntarily provided full Mine Safety & Health Administration training to our workforce

ENVIRONMENT

- **ZERO Reportable Environmental Incidents** since commencing drill programs
- Strong environmental team with deep permitting experience
- Demonstrated commitment to concurrent reclamation, with more than 20 acres of exploration pads reclaimed through year end 2024

COMMUNITY

- **More than \$26.5 Million Invested in South Dakota** through payroll, payments to vendors and contractors and purchases on land and buildings
- **Hosted 17 Community Engagement Events**

GOVERNANCE

- ESG Committee oversees strong policies including:
 - Code of Ethics
 - Community Relations Policy
 - Environmental Policy
 - Anticorruption Policy
- Expert Board and Management team with extensive experience advancing exploration projects through to production, including direct technical experience working in the Homestake District with open pit Wharf and underground Homestake Mines.

Directors and Management

~88% of Dakota Gold employees live in South Dakota with 13 South Dakota School of Mines alumni, students or former faculty

BOARD OF DIRECTORS

Robert Quartermain <i>Co-Chair, Director, President and CEO</i>	Past Executive Chairman of Pretium Resources Inc. and CEO of Silver Standard. Inducted to Canadian Mining Hall of Fame in 2022.
Stephen O'Rourke <i>Co-Chair, Director and Managing Director</i>	Former President of Global Petroleum Exploration for BHP Billiton.
Gerald Aberle <i>COO, Director</i>	Homestake Mining Company (22 years). Co-founder of DTRC.

Amy Koenig <i>Lead Independent Director</i>	VP, Governance, Corporate Secretary & Deputy General Counsel for Black Hills Corporation. Director for Children's Home Society of South Dakota.
Alice Schroeder <i>Director</i>	Serves or has served on numerous public company boards including Carbon Streaming Corp., Natus Medical Inc., HSBC North America Holdings Inc., and Prudential plc.
Jennifer Grafton <i>Director</i>	Currently serves as Lead Independent Director of Farmland Partners, Inc. and most recently served as EVP & General Counsel of E2open Parent Holdings Inc.

MANAGEMENT

Patrick Malone <i>SVP & Chief Legal Officer</i>	Former Vice President at Barrick Gold and President of Homestake Mining Company of California. Over twenty years of in-house legal and experience with permitting and closing mining operations.
Shawn Campbell <i>CFO</i>	Former Chief Financial Officer of GT Gold Corp. Experience with both Goldcorp, Newmont and the Wharf Mine.
James Berry <i>VP, Exploration</i>	Worked for Barrick at Homestake and for Goldcorp at Wharf, in the Homestake District. Previously VP, Exploration for Romarco Minerals.
Carling Gaze <i>VP of IR and Corp Communications</i>	Former Senior Investor Relations and Corporate Communications Associate of Pretium Resources Inc. with over 15 years of experience in the mining and natural resource industry.
Mark Rantapaa <i>VP Operations</i>	Operations Manager of Black Hills Operations at DTRC. Over 36 years in mining including 26 years with Barrick Gold Corporation. South Dakota School of Mines and Technology / BS Geological Eng.

Ron Everett <i>Sr. Manager – Business</i>	Mayor of Lead with 47 years of experience in mining including Administration Manager of Wharf Mine and Richmond Hill Mine.
Timm Comer <i>Environmental Director</i>	Three decades of experience in environmental permitting, policy development, and compliance program implementation of mining properties with effective operation, reclamation, and closure focus. Black Hills State University graduate.
Bill Gehlen <i>Sr. Manager - Geology</i>	Former Manager, Corporate Development at Gold Standard Ventures and former Manager, Resource Development with OceanaGold.
Elizabeth Sailer <i>VP, External Relations</i>	Over twenty years of experience in public, governmental and media relations, communications and partnership collaborations throughout South Dakota. South Dakota School of Mines graduate.

2025 Transformational Year Leading to the Next Era of the Homestake Gold District

CATALYSTS:

- ✓ **Announced Heap Leachable Oxide Gold Resource of 3.65 Moz of M&I resources at Richmond Hill in Q1 2025**
- ✓ **Announced close of \$35 Million financing in Mar 2025**
- **Complete Richmond Hill IA with Cash Flow planned for mid-2025**
- **Commence Feasibility Study work for Richmond Hill mid-2025**
- **Continue infill and step-out drilling at Richmond Hill**
- **Ongoing permitting studies**
- **Assessing drill program targeting at Maitland**

Appendix

Richmond Hill - Heap Leachable Resource

RESOURCE CATEGORY	AuEq CUT OFF GRADE (G/T)	KTONNES	AuEq (G/T)	GOLD (G/T)	SILVER (G/T)	GOLD (KOZ)	SILVER (KOZ)
MEASURED TOTAL		103,190	0.562	0.542	5.49	1,793.4	18,208
Oxide	0.089	85,762	0.566	0.542	5.73	1,493.7	15,788
Transition	0.141	17,428	0.552	0.535	4.32	299.7	2,421

INDICATED TOTAL		141,537	0.429	0.408	4.39	1,860.0	19,884
Oxide	0.089	115,427	0.418	0.401	4.39	1,488.7	16,286
Transition	0.141	26,111	0.459	0.442	4.29	371.3	3,598

M&I TOTAL		244,728	0.483	0.463	4.83	3,653.3	38,092
----------------------	--	----------------	--------------	--------------	-------------	----------------	---------------

Mineral resource is based on a constrained block model using drill results up to November 2, 2024 using an inverse distanced squared methodology and the following assumptions:

Notes:

- A gold price of \$2,000 per ounce and a silver price of \$25 per ounce was used for the mineral resource..
- Mineral Resources are based on a gold equivalent cut-off grade of 0.089 g/t for oxide and 0.141 g/t for transition material. Mineral resources for mill material are based on gold equivalent cut-off of 0.171 g/t.
- The gold equivalent values account for metal recoveries, treatment charges, refining costs, and refinery payable percentages.
- The resource was divided into oxidized, transitional, and sulfide based on expected differences in gold recovery and process costs. The oxide recovery in the report is 89%, the transitional recovery was 65%, and the sulfide recovery was 85%.
- Includes a preliminary estimated royalty rate of 3.8% averaged across the project.
- The mineral resources are reported in relation to a conceptual constraining pit shell to demonstrate reasonable prospects for economic extraction.

See S-K 1300 Initial Assessment Report Table 1-1 for full list of assumptions

- The resource is informed by a historical database containing 56,734 gold assays from 902 drill holes totaling 90,447 meters of drilling, and an additional 30,743 gold assays from 146 drill holes totaling 45,540 meters of drilling by Dakota Gold since 2022 to expand the resource.

Grade vs tonnage Curve for M&I Leach Resource

- The grade / tonnage curve for the M&I Leach resource provides insight into the resource and what it looks like at all possible cut-offs.
- At the Wharf mine, reserve cut-off of 0.01 oz/t (0.343 g/tonne), the resulting resource grade would be 0.021 oz/t (0.720 g/tonne).
- Based on same cut off grade as Wharf, Richmond Hill would have 2.8 Million oz of M&I and 1.7 million oz of Inferred.
