

DAKOTA GOLD

Building the Next Gold Mine in the Homestake District

NYSE American: DC

Investor Presentation | June 2026

dakotagoldcorp.com

Dakota Gold is focused on responsible exploration and development of gold mines in the Homestake District of Lead, South Dakota.

Disclaimer

Forward-Looking Statements

This communication contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. When used in this communication, the words “plan,” “target,” “anticipate,” “believe,” “estimate,” “intend,” “potential,” “will” and “expect” and similar expressions are intended to identify such forward-looking statements. Any express or implied statements contained in this communication that are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation: our expectations regarding additional drilling, metallurgy and modeling; our ability to deliver a new maiden resource at the Maitland Project by year end, our expectations for the improvement and growth of the mineral resources and potential for conversion of mineral resources into reserves; completion of a pre-feasibility study, a feasibility study, and/or permitting; our expectations regarding free cash flow and future financing, and our overall expectation for the possibility of near-term production at the Richmond Hill project. These forward-looking statements are based on assumptions and expectations that may not be realized and are inherently subject to numerous risks and uncertainties, which could cause actual results to differ materially from these statements. These risks and uncertainties include, among others: the execution and timing of our planned exploration activities; our use and evaluation of historic data; our ability to achieve our strategic goals; the state of the economy and financial markets generally and the effect on our industry; and the market for our common stock. The foregoing list is not exhaustive. For additional information regarding factors that may cause actual results to differ materially from those indicated in our forward-looking statements, we refer you to the risk factors included in Item 1A of the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2025, as updated by annual, quarterly and current reports that we file with the SEC, which are available at www.sec.gov. We caution investors not to place undue reliance on the forward-looking statements contained in this communication. These statements speak only as of the date of this communication, and we undertake no obligation to update or revise these statements, whether as a result of new information, future events or otherwise, except as may be required by law. We do not give any assurance that we will achieve our expectations.

All references to “\$” in this communication are to U.S. dollars unless otherwise stated.

U.S. Gold production and consumption

Historical U.S. Annual Gold Production ¹

YEARS	TONNES
2000	302
2010	209
2020	175
2024	145

U.S. Gold Production Down 55%

- U.S. Executive Order (March 20, 2025) designated critical minerals as well as gold as a focus for development in securing U.S. domestic supply. ²
- Current U.S. gold production does not meet domestic consumer demand of 679.3 tonnes in 2025. ³
(Consumer demand: sum of jewelry, technology, bar and coin, and ETF investment)

U.S. State Estimated Production 2025 ¹

STATE	OUNCES
Nevada	4,000,000
Alaska	1,000,000
Colorado	325,000
South Dakota + Richmond Hill est Oz	250,000
Utah	210,000
California	150,000
South Carolina	140,000
South Dakota	100,000

South Dakota Gold Production (1878-2025) ¹

Gold and Silver in cell phones and data center servers

- In addition to the conventional uses for gold and silver in investment and jewelry, they are critical to our everyday use in items such as cell phones and data center servers.

Data Centers

- Based on the workload of servers in AI data centers, there can be 1kg-3.5kg of gold.
- A single 500-megawatt solar array built to power a hyperscale data center, requires approximately 300 metric tons of silver.
- Hines Research estimates there are 20,000 acres of server farms in the world doubling to 40,000 acres by 2030.

Cell Phones

- Modern smartphones contain over 60 different elements, featuring a mix of precious, base, and rare earth metals essential for functionality.
- The average smart phone contains ~ 30mg of gold (30 phones per gram of gold) and ~350mg of silver.
- Erickson estimates there are over 7 billion cell phones in the world.

Dakota Gold, NYSE American: DC is a unique investment opportunity for exposure to a U.S. development stage gold asset, with Richmond Hill and high-grade gold exploration optionality at Maitland.

Dakota Gold

– A unique investment opportunity

- Gold and Silver prices and demand at record highs during a time of production deficits
- Leadership team with track record success
- Advancing the Richmond Hill Gold Project, one of the largest undeveloped heap leach gold resources in the U.S. with production targeted as soon as 2029
 - Robust economics outlined in Initial Assessment with Cash Flow announced July 2025
 - Pre-Feasibility Study H2 2026 / Feasibility Study H1 2027
- Maitland Unionville Zone infill drilling 2026 / maiden resource Q1 2027
- Principal projects on Private Land in historic Homestake District of South Dakota with existing infrastructure
- Funded through Feasibility - \$107M cash balance (as at Mar 31, 2026)

Richmond Hill Gold Project

- Private Land
- Over 3,000 mineral acres
- Development stage
- **S-K 1300 Heap Leachable Resource:**
 - 3.65 M oz M&I Gold
 - 2.61 M oz Inferred Gold
 - 38.1 M oz M&I Silver
 - 22.8 M oz Inferred Silver

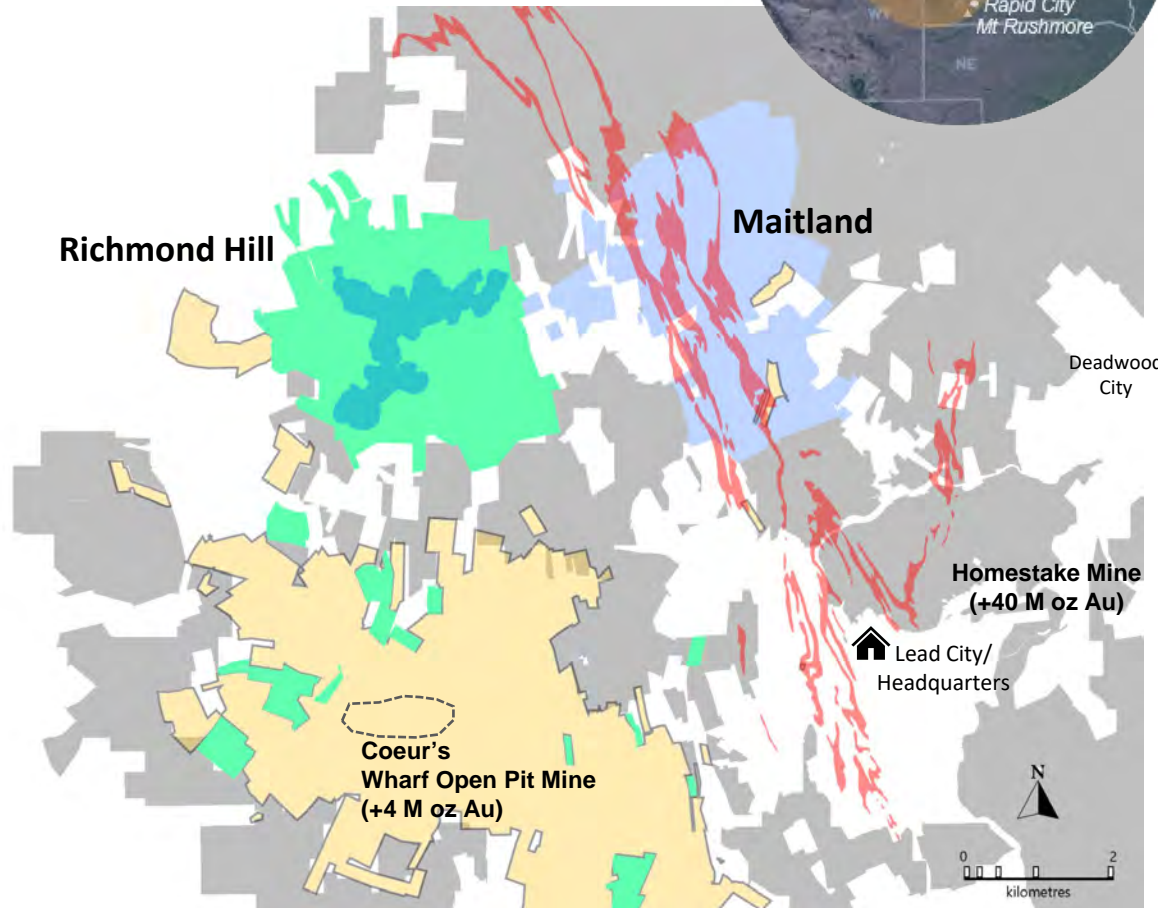

• S-K 1300 IACF (at US \$2,350/oz Au)

(US\$)	M&I plan	MI&I plan
After-tax NPV _{5%}	\$1.6 B	\$2.1 B
After-tax IRR	55%	59%
Initial Capital	\$384 M	\$383 M
After-tax Payback (yrs)	1.7	1.5
Mine Life (yrs)	17	28
LOM Gold Prod (M ozs)	2.60	3.98
LOM Avg Annual Gold Prod (oz/yr)	153,000	142,000
LOM AISC (\$/oz)	\$1,047	\$1,050

Homestake District: New Opportunities

Legend - Dakota Gold holds over ~48k mineral acres in the Homestake District

- Dakota Gold Land Package
- Richmond Hill – Private Land
- Homestake Iron Formation
- Richmond Hill – M&I resource
- Wharf open pit mine
- Maitland - Private Land
- Wharf Land Package
- 🏠 Dakota Gold Headquarters

Maitland Gold Project

- Private Land
- 2,364 mineral acres
- Exploration stage
- Contiguous with Homestake Mine
- Two Discoveries:
 - **JB Gold Zone Homestake Mine-style gold mineralization (iron formation)**
 - Average Grade: 10.76 g/t Au over 4.0 meters
 - Analogous to Homestake's West Ledge System - 6 million oz gold produced with Average grade: 11.63 g/t Au over 6.1 meters
 - **Unionville Zone shallow Tertiary epithermal gold mineralization**
 - Average Grade: 4 g/t Au over 6.4 meters

Richmond Hill – IACF supports simple, open pit, heap leach project

(US\$)	M&I plan	MI&I plan

\$2,750	\$1,915	\$2,127	\$2,338	\$2,549	\$2,761
\$3,150	\$2,439	\$2,682	\$2,924	\$3,167	\$3,409
\$3,550	\$2,964	\$3,237	\$3,511	\$3,784	\$4,057
\$3,950	\$3,488	\$3,792	\$4,096	\$4,401	\$4,705
\$4,150	\$3,750	\$4,070	\$4,389	\$4,709	\$5,029

Richmond Hill - M&I plan production and cost profile

M&I plan

**153,000 oz/yr
GOLD PRODUCTION**

**2.6 Moz
GOLD
LOM PRODUCTION**
(17-year mine life)

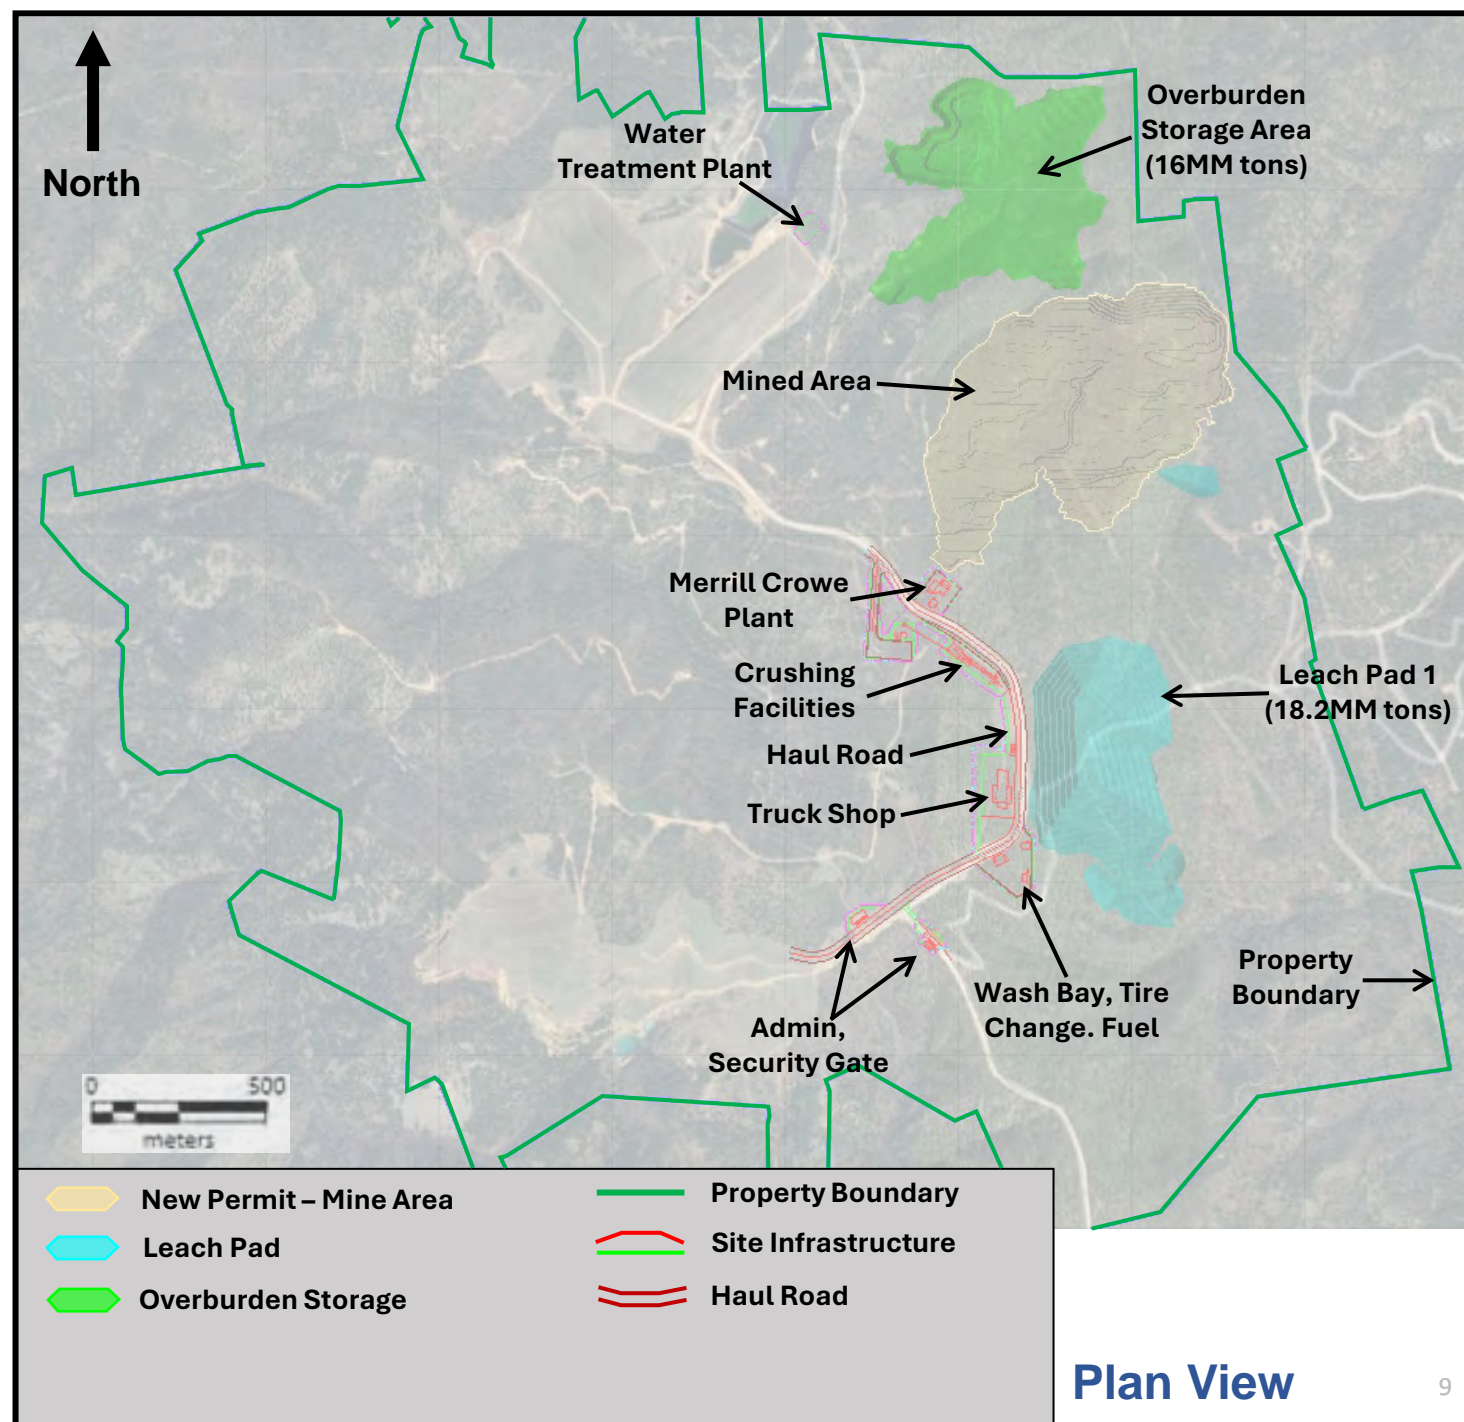

**8.7 Moz
SILVER
LOM PRODUCTION**
(17-year mine life)

**US\$1,047/oz
LOM AISC**
(US\$2,350/oz Gold Price)
(US\$29/oz Silver Price)

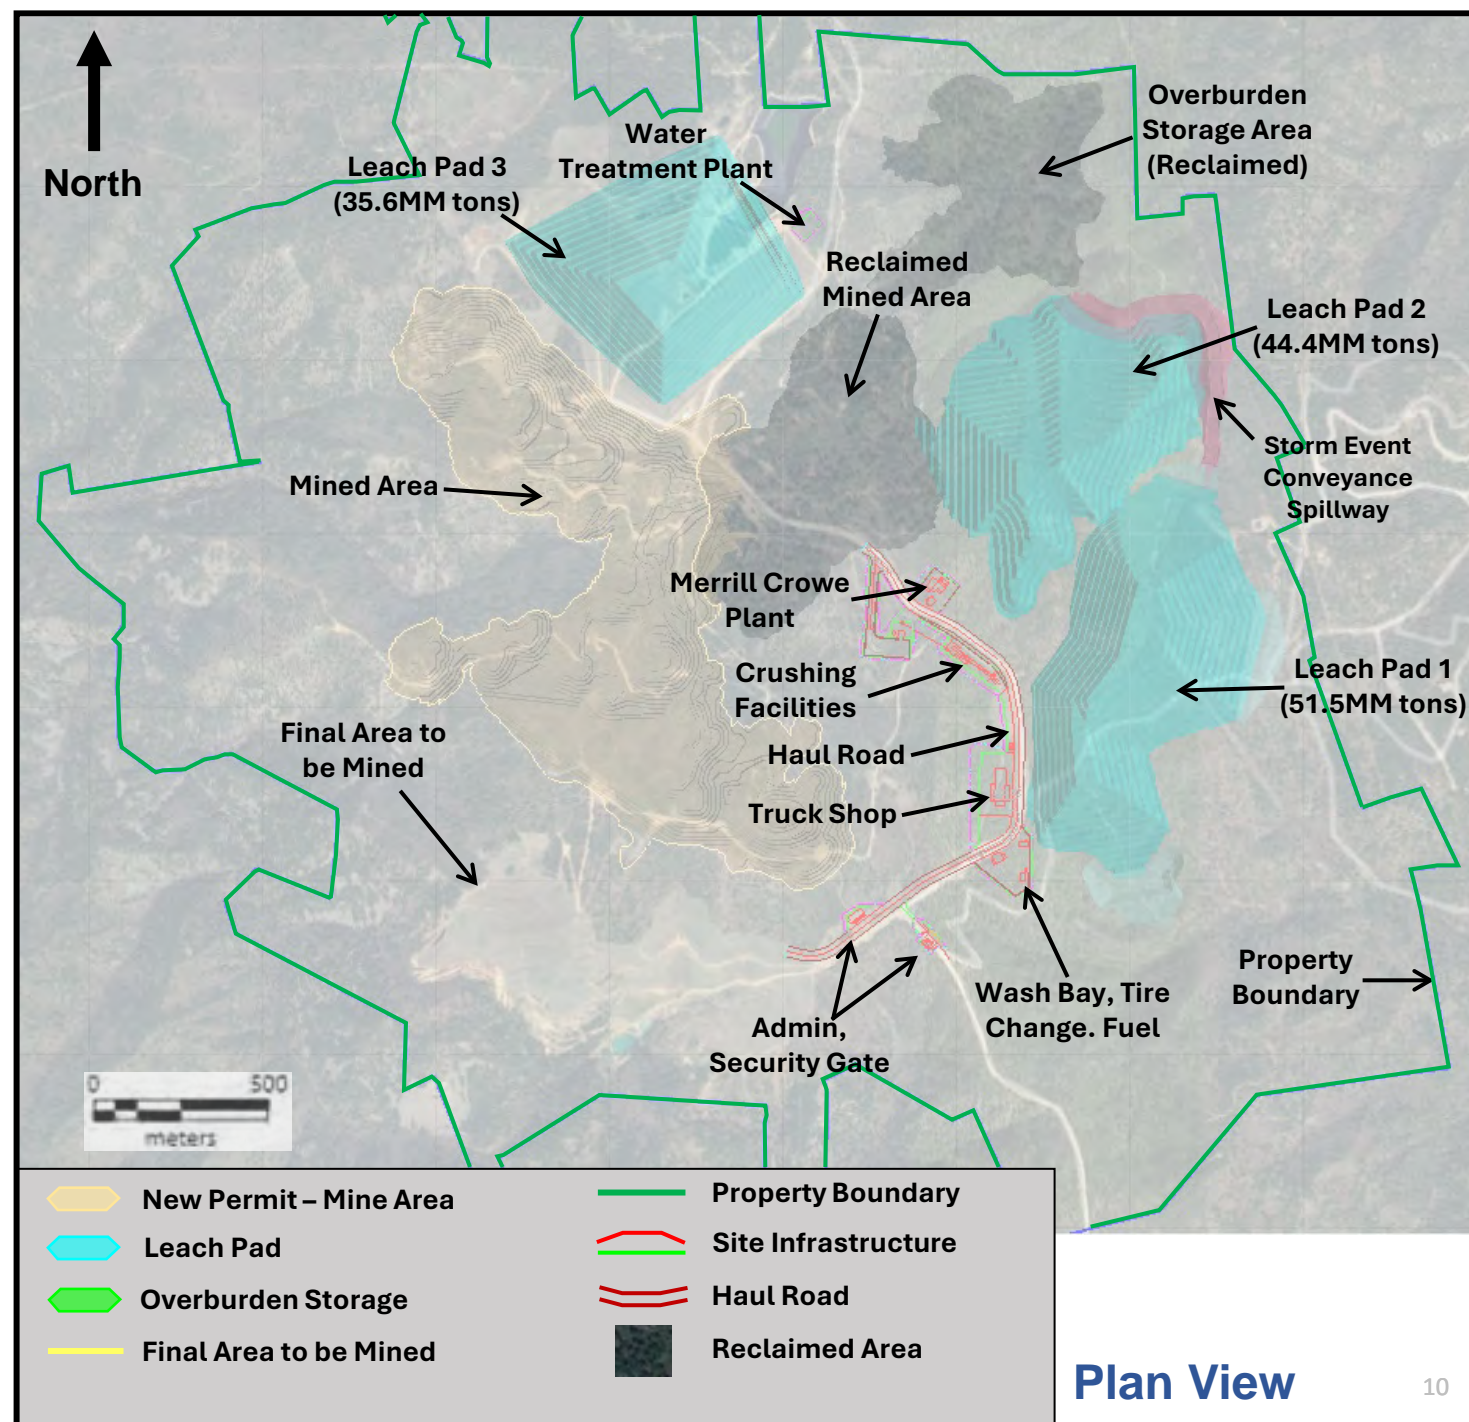

Richmond Hill – Phase 1 & 2 mine plan

- 580 acres of net disturbance is anticipated with the initial permit
- Initial mining to start in higher value northern portion of Project and continue to progress south over life of mine

Richmond Hill – Phase 3-5 mine plan

- Concurrent reclamation with mining to reduce disturbance footprint
- Backfill and shaped to fulfill final designed and approved topography
- Area revegetated to final presented and approved revegetation plans
- Area to include storm water management designed and approved in management plan

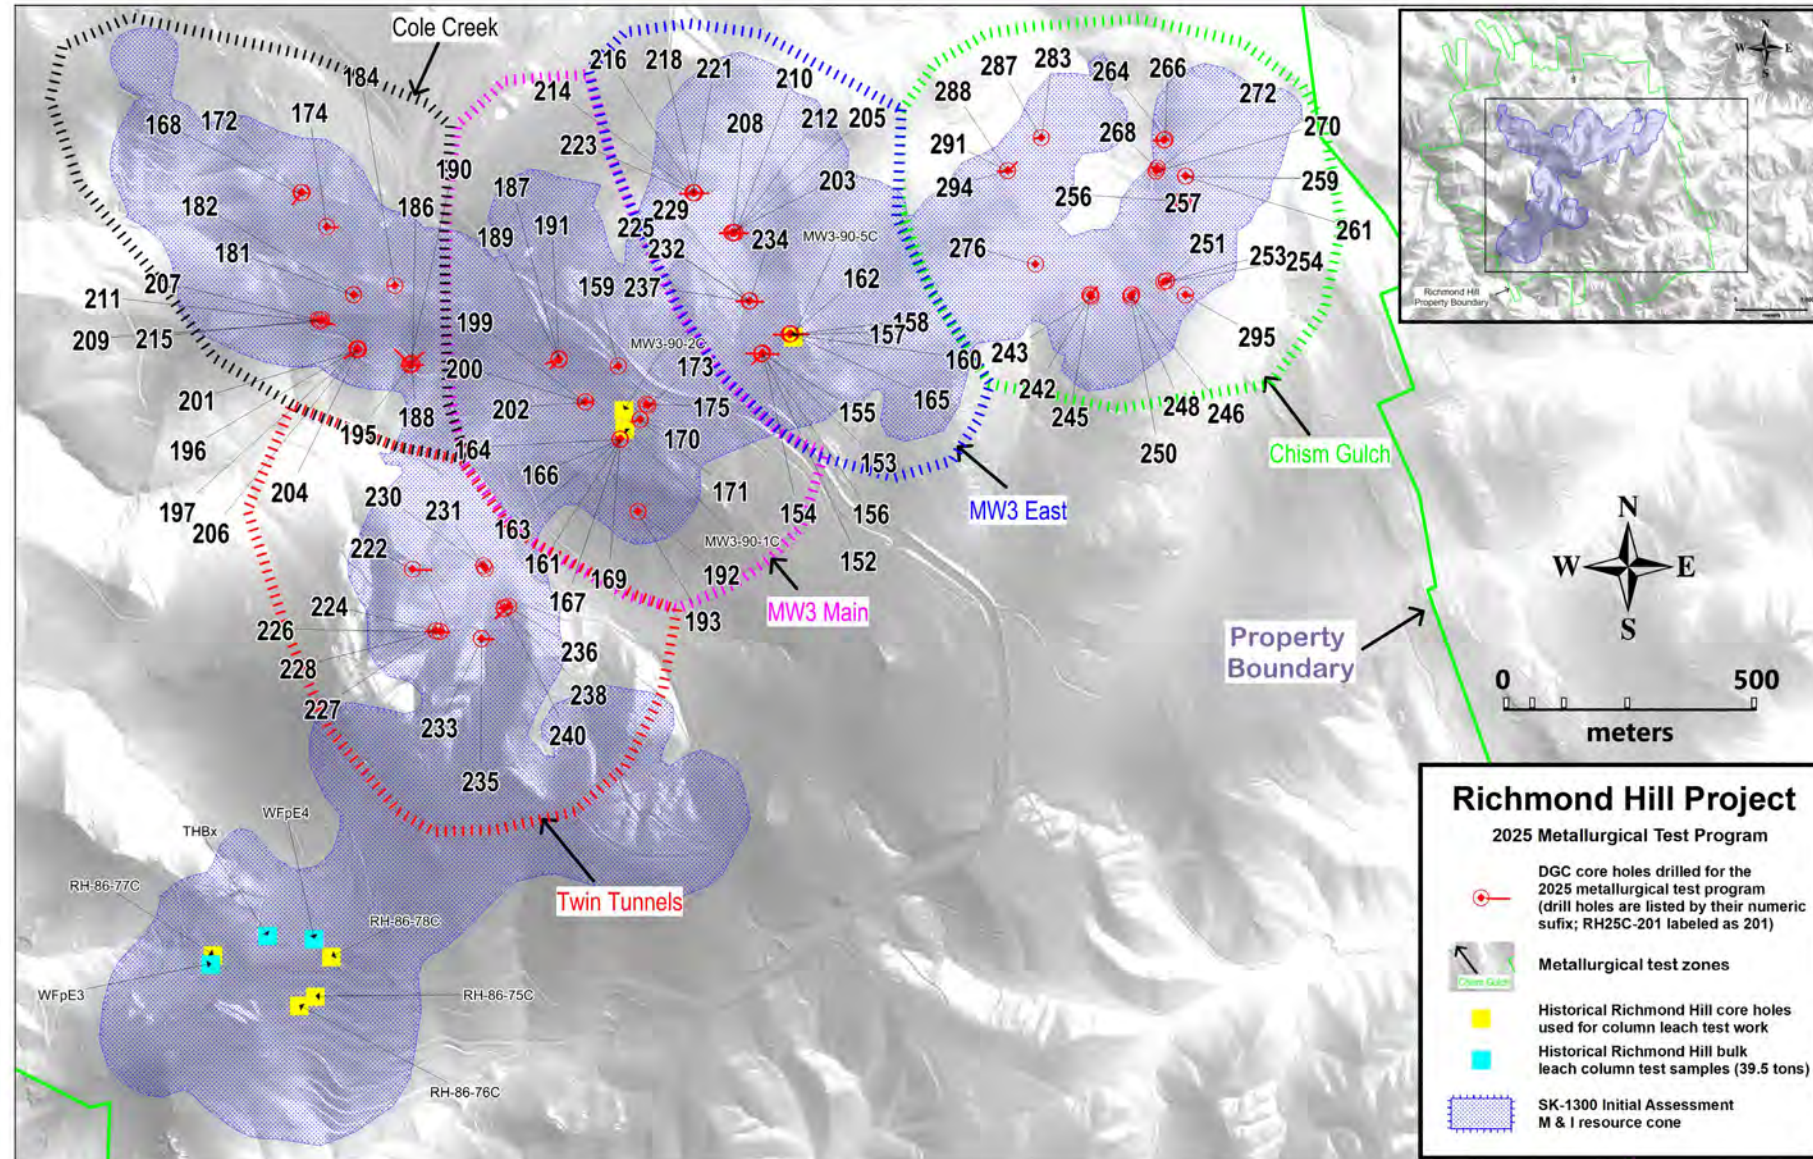

Richmond Hill - 2026 metallurgical test work

The metallurgical testing program is in progress and scheduled completion in Q3 2026, with staged testing and reporting milestones throughout.

Metallurgical testing scope of work:

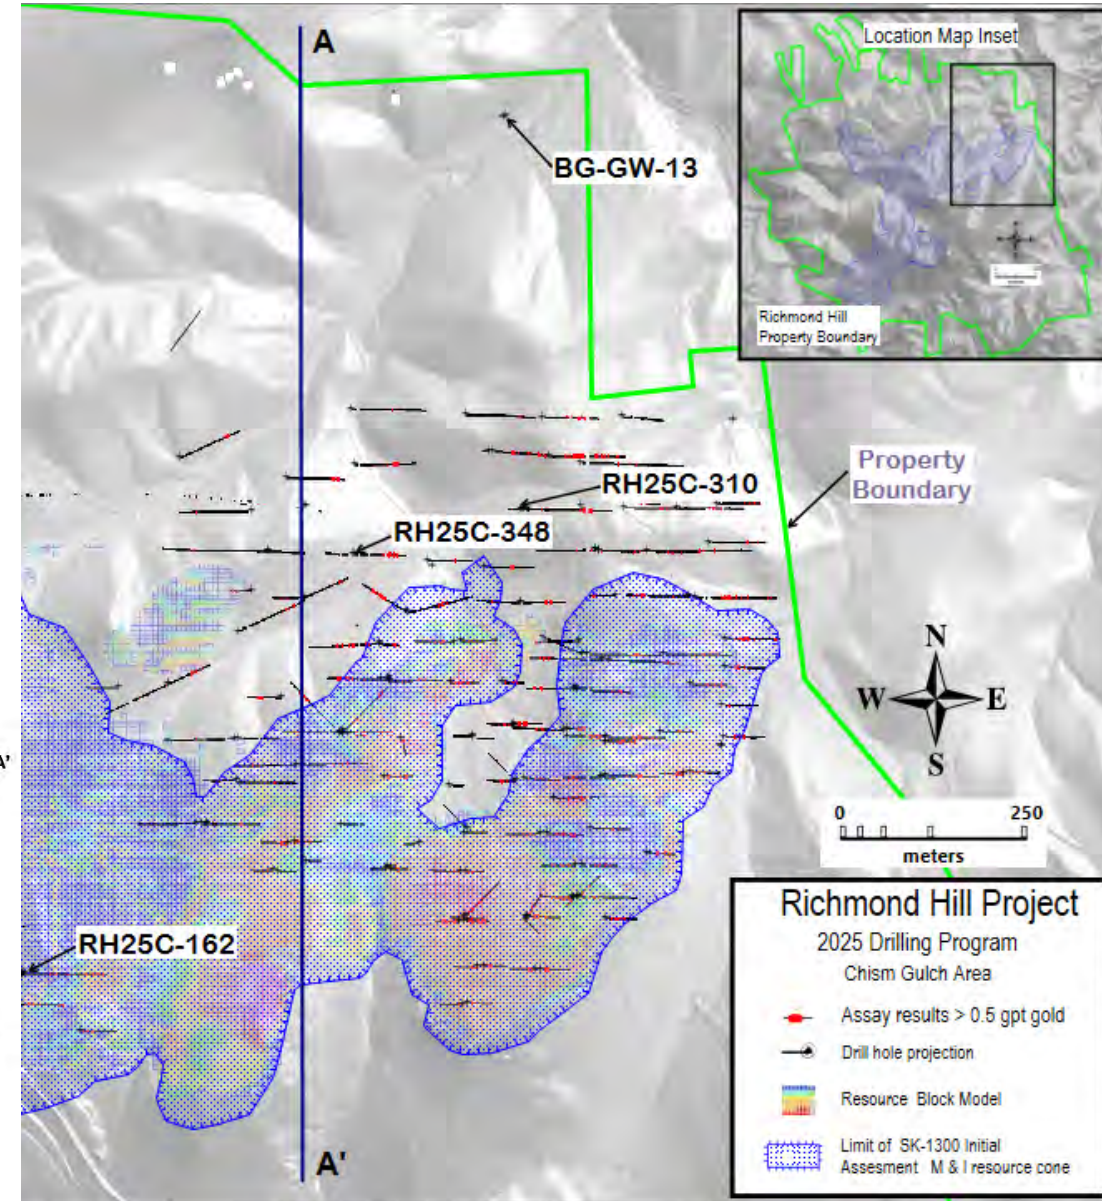

- Ore Characterization & Preliminary Testing
- Column Leach Testing
- Comminution & Crushing Studies
- Process Optimization & Recovery
- Deleterious Elements & Environmental Testing

Richmond Hill

– 2025 infill/expansion drilling

- Total of 29,524 meters (96,865 feet) of drilling in 242 holes completed in the 2025 campaign.
- Campaign included infill, expansion, metallurgical, site infrastructure and water well testing that will inform the 2026 Pre-Feasibility Study.
- Three of the highest-grade gold intervals from the campaign were located in the northeast project area:
 - RH25C-310 - 5 g/t Au and 28.64 g/t Ag over 24.9m (124 gram meters Au)
 - Incl. 60.82 g/t Au and 61.68 g/t Ag over 1.5m (89 gram meters Au)
 - RH25C-348 - 2.46 g/t Au and 19.16 g/t Ag over 32.7m (81 gram meters Au)
 - RH25C-162 - 1.85 g/t Au and 25.39 g/t Ag over 43.4m (80 gram meters Au)

Richmond Hill

– 2026 infill/expansion and Feasibility drill plan

- Total of 15,481 meters (50,790 feet) of drilling in 109 holes
 - 10-Year Mine Plan
 - 6,700 meters (22,040 feet)
 - Infill drilling within the 10-Year mine plan to convert inferred to measured and indicated
 - Northern Expansion:
 - 2,300 meters (7,500 feet)
 - Step-out drilling to add ounces north and north-east of the 10-year mine plan
 - Overburden Stockpile Area (OSA):
 - 3,200 meters (10,580 feet)
 - Condemnation drilling for the proposed OSA
 - South Infrastructure
 - 1,000 meters (3,220 feet)
 - Condemnation drilling for the initial heap leach pad
 - Geotech (Not shown)
 - 2,300 meters (7,450 feet)
 - Geotechnical drilling into pit walls for pit slope stability studies

Richmond Hill - Feasibility trade-off studies

- **Mining and Stacking Tonnage Rates**
 - IACF 30,000 tpd versus 60,000 tpd optimized mining throughput and stacking rate to maximize ounce profile, cash flow, LOM timeline, and overall project financials
 - Crushing and stacking rates will drive sizing and configuration of crushing circuit and Merrill-Crowe recovery plant
- **Mine Sequencing**
 - Evaluating opportunities to sequence mining in areas with higher grade gold in initial years
- **Truck Stacking versus Conveyor Stacking**
 - Greater operational flexibility & efficiency with truck stacking versus conveyor stacking...especially at higher tonnage rates
 - Pad placement, stacking rates, & pad geometry all factors that impact stacking methodology selection
- **Agglomeration**
 - The requirement for agglomeration will be driven by ore characteristics and permeability testing conducted during metallurgical testing program
- **Heap Leach Pad Location, Quantity, Sizing, and Purpose**
 - Siting study will inform suitable locations for operationally stable and efficient leach pad placement
 - Regulated surface disturbance will determine area extent of pads
 - Engineering and design of heap leach pads will likely be a hybrid of stationary and "non-permanent" (i.e. on-off)

Conveyor Stack

Truck Stack

Agglomeration

Heap Leach Design

Richmond Hill - Location and infrastructure

Location:

- Project 15-minute drive from headquarters in Lead

Labor:

- South Dakota provides access to labor for exploration through to production

Infrastructure:

- Project has an existing powerline and road connected to grid
- As the project has a population catchment of 200,000 within a one-hour drive of the project, necessary services are available and there is no need for camp facilities

Richmond Hill – Timeline to production

1. See news release Feb 6, 2025 re Barrick Gold has extended the option period for the Richmond Hill option agreement until December 31, 2028 with Dakota Gold.

Maitland Gold Project - High-grade exploration optionality

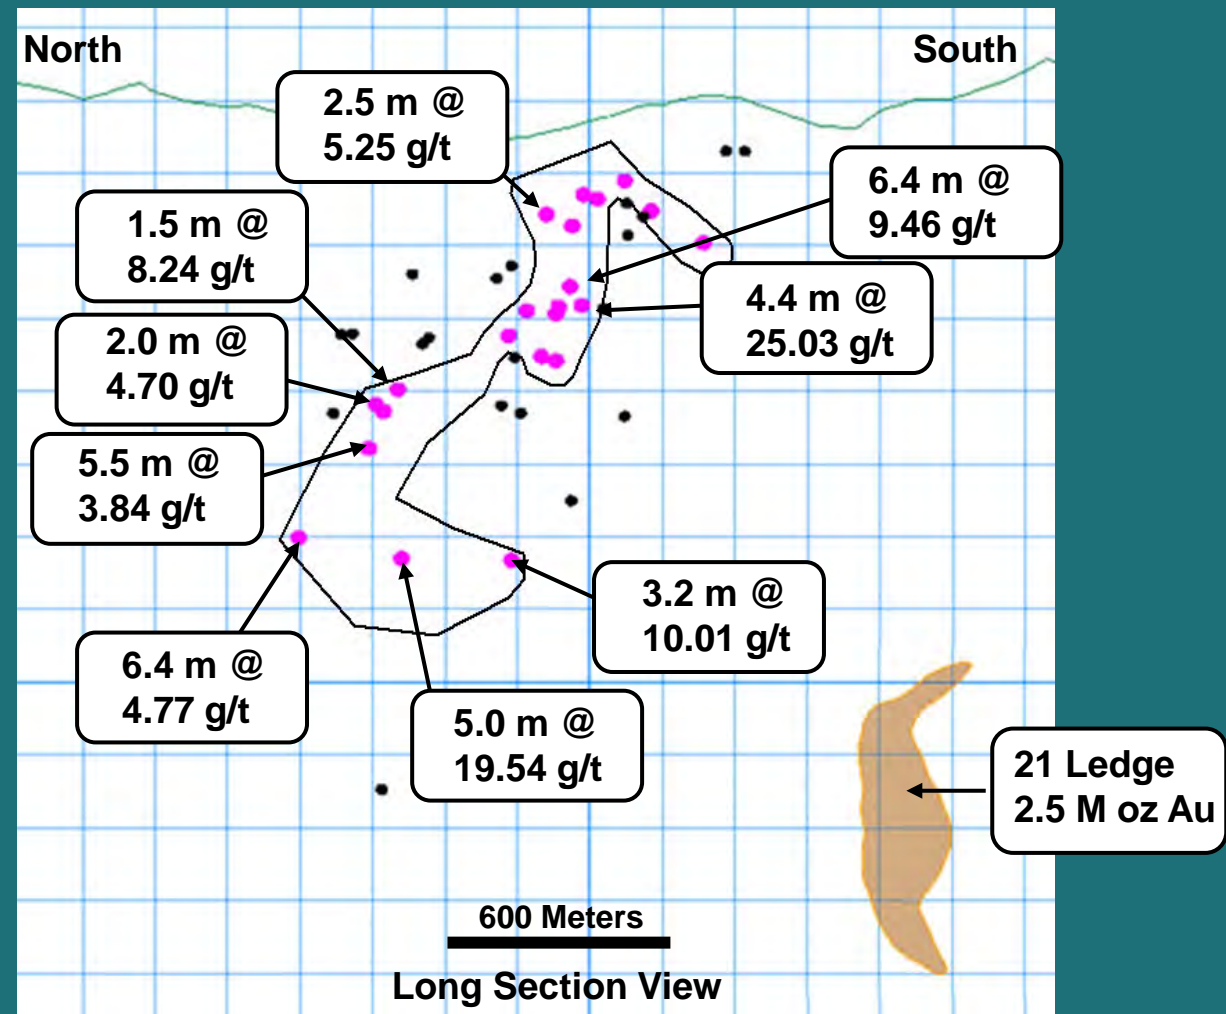

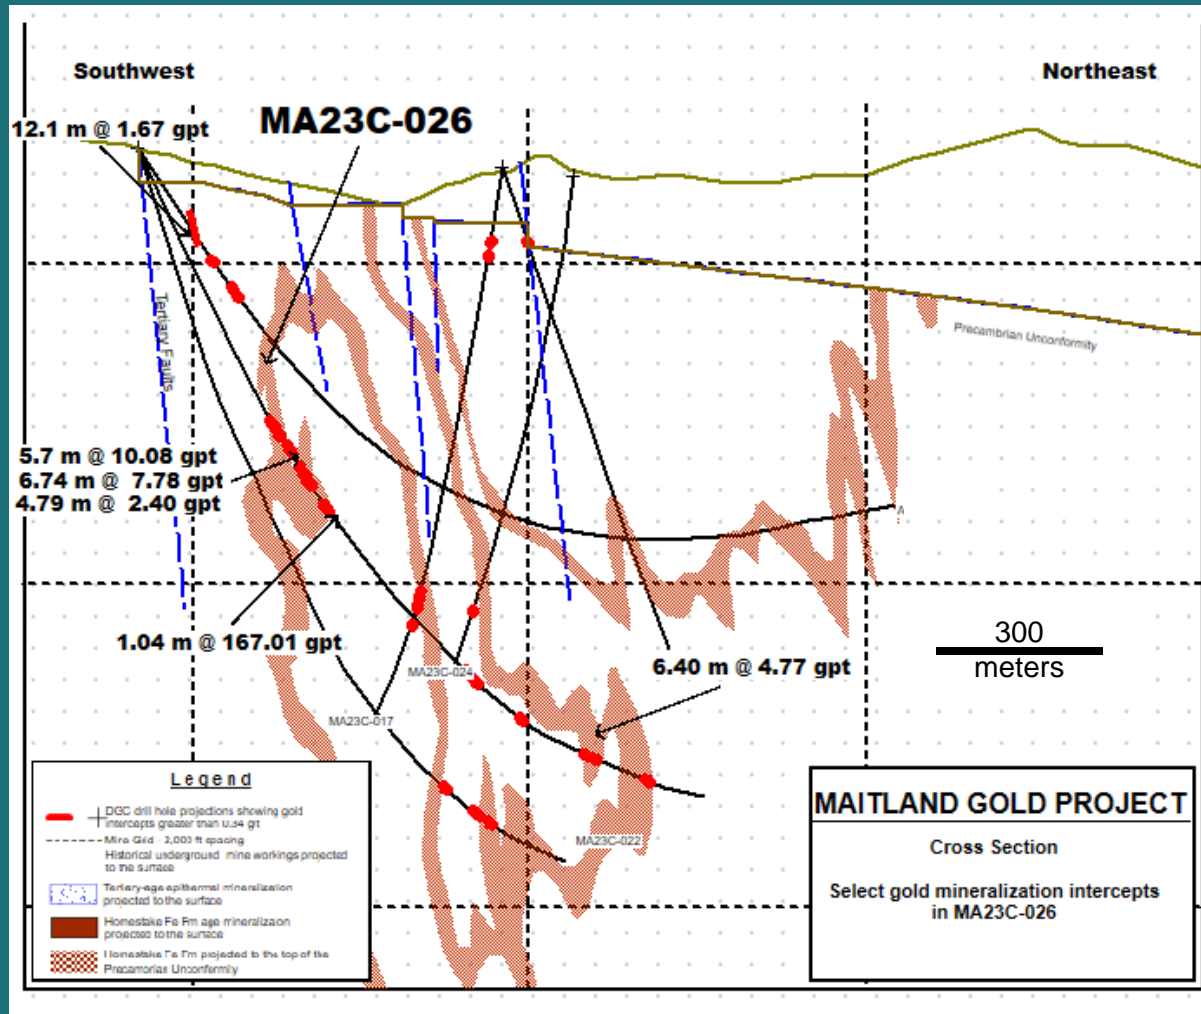

JB Gold Zone

- Approx. 47 Drill Holes from surface
- Avg grade of 10.76 g/t Au and width of 4.0 m

West Ledge System - 6 million oz gold produced

- Approx. 6,000 Drill Holes underground
- Avg grade of 11.63 g/t Au and width of 6.1 m

Maitland – JB Gold Zone analogous to West Ledge System

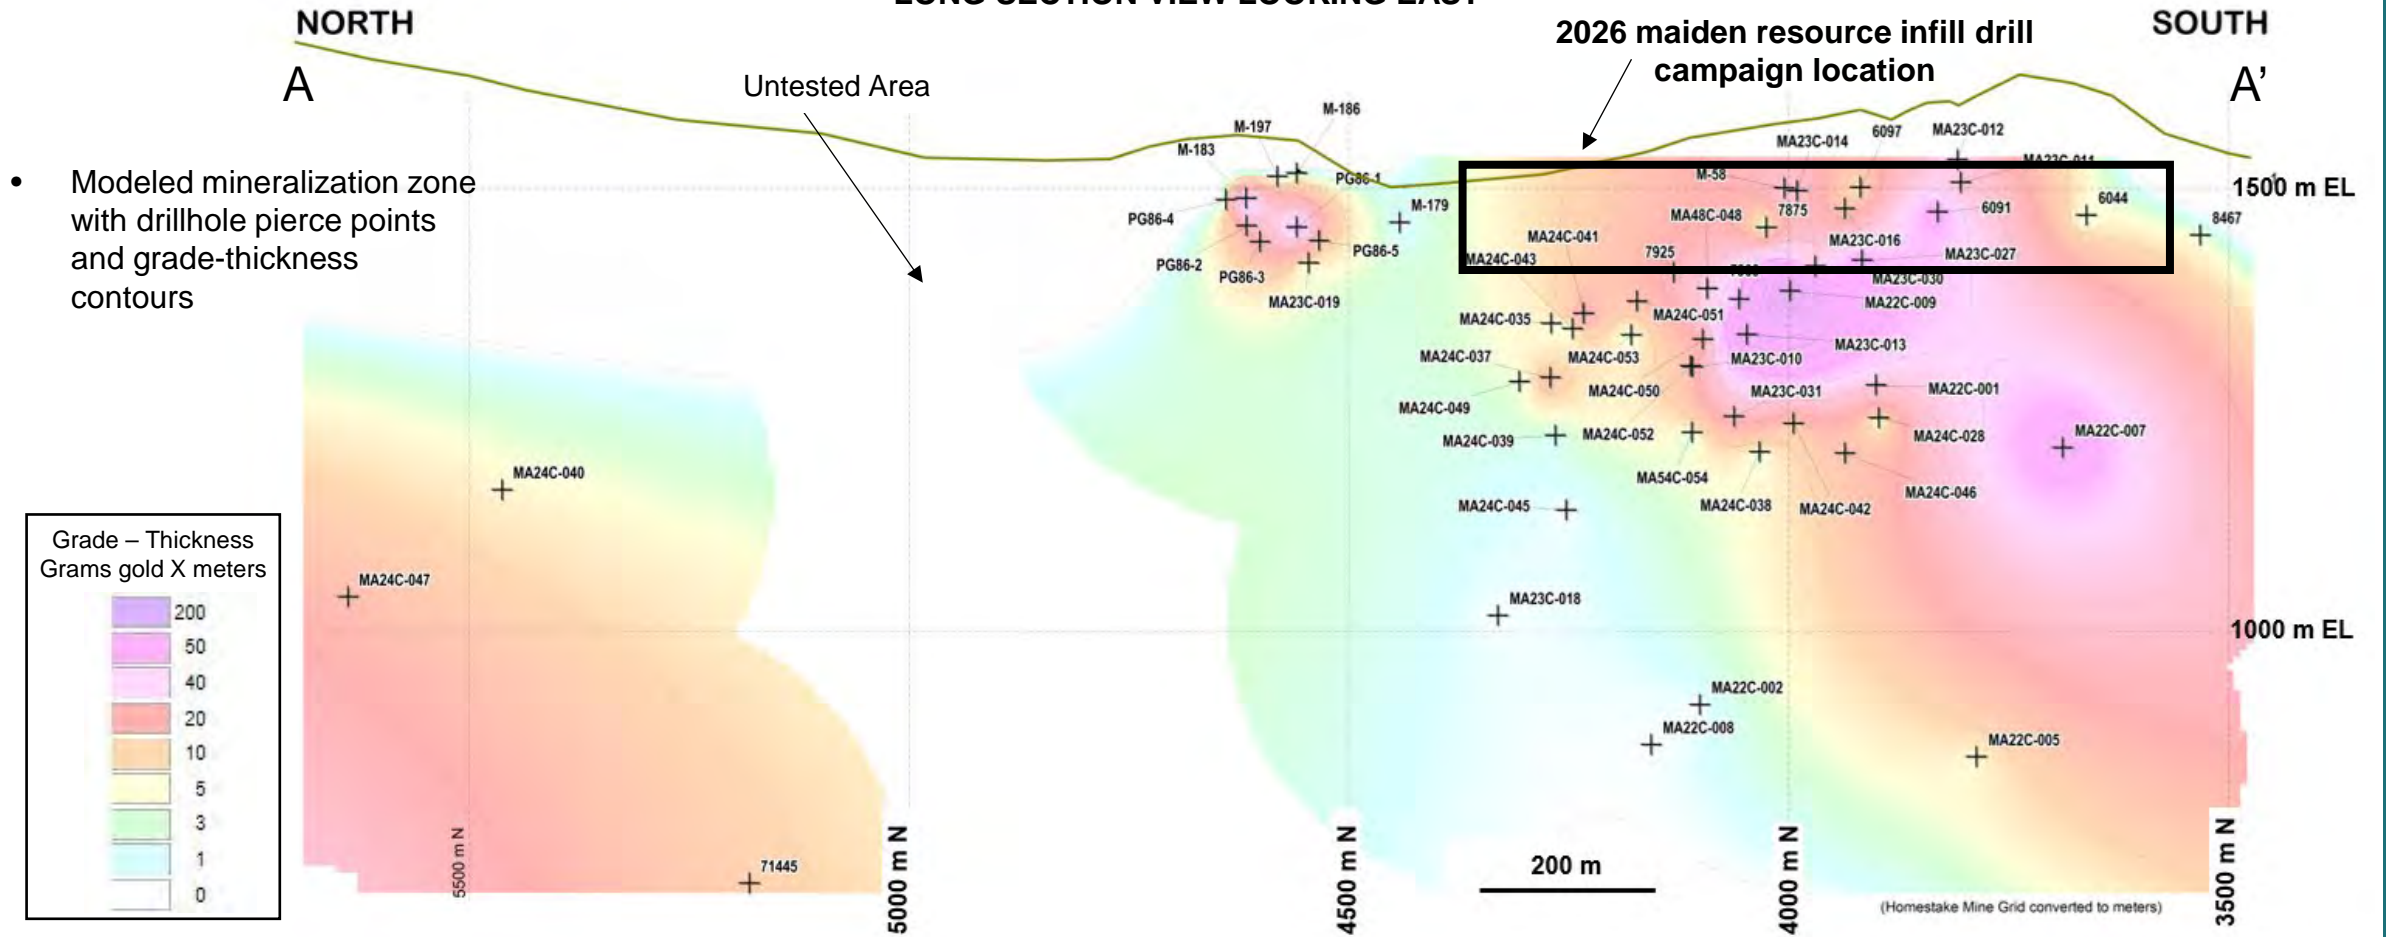

- Homestake Mine 21 Ledge System Outline Drawn to Scale for Comparison to Maitland Homestake Drill Intercepts
- Mineralized Intercept (not always True Thickness)
- Unmineralized Intercept

Maitland – Unionville Zone long section

MAITLAND – UNIONVILLE ZONE
LONG SECTION VIEW LOOKING EAST

- Modeled mineralization zone with drillhole pierce points and grade-thickness contours

- To date 25 drill hole intersections have been made into the tertiary Unionville Zone averaging a grade of ~ 4 g/t Au over 6.4 meters

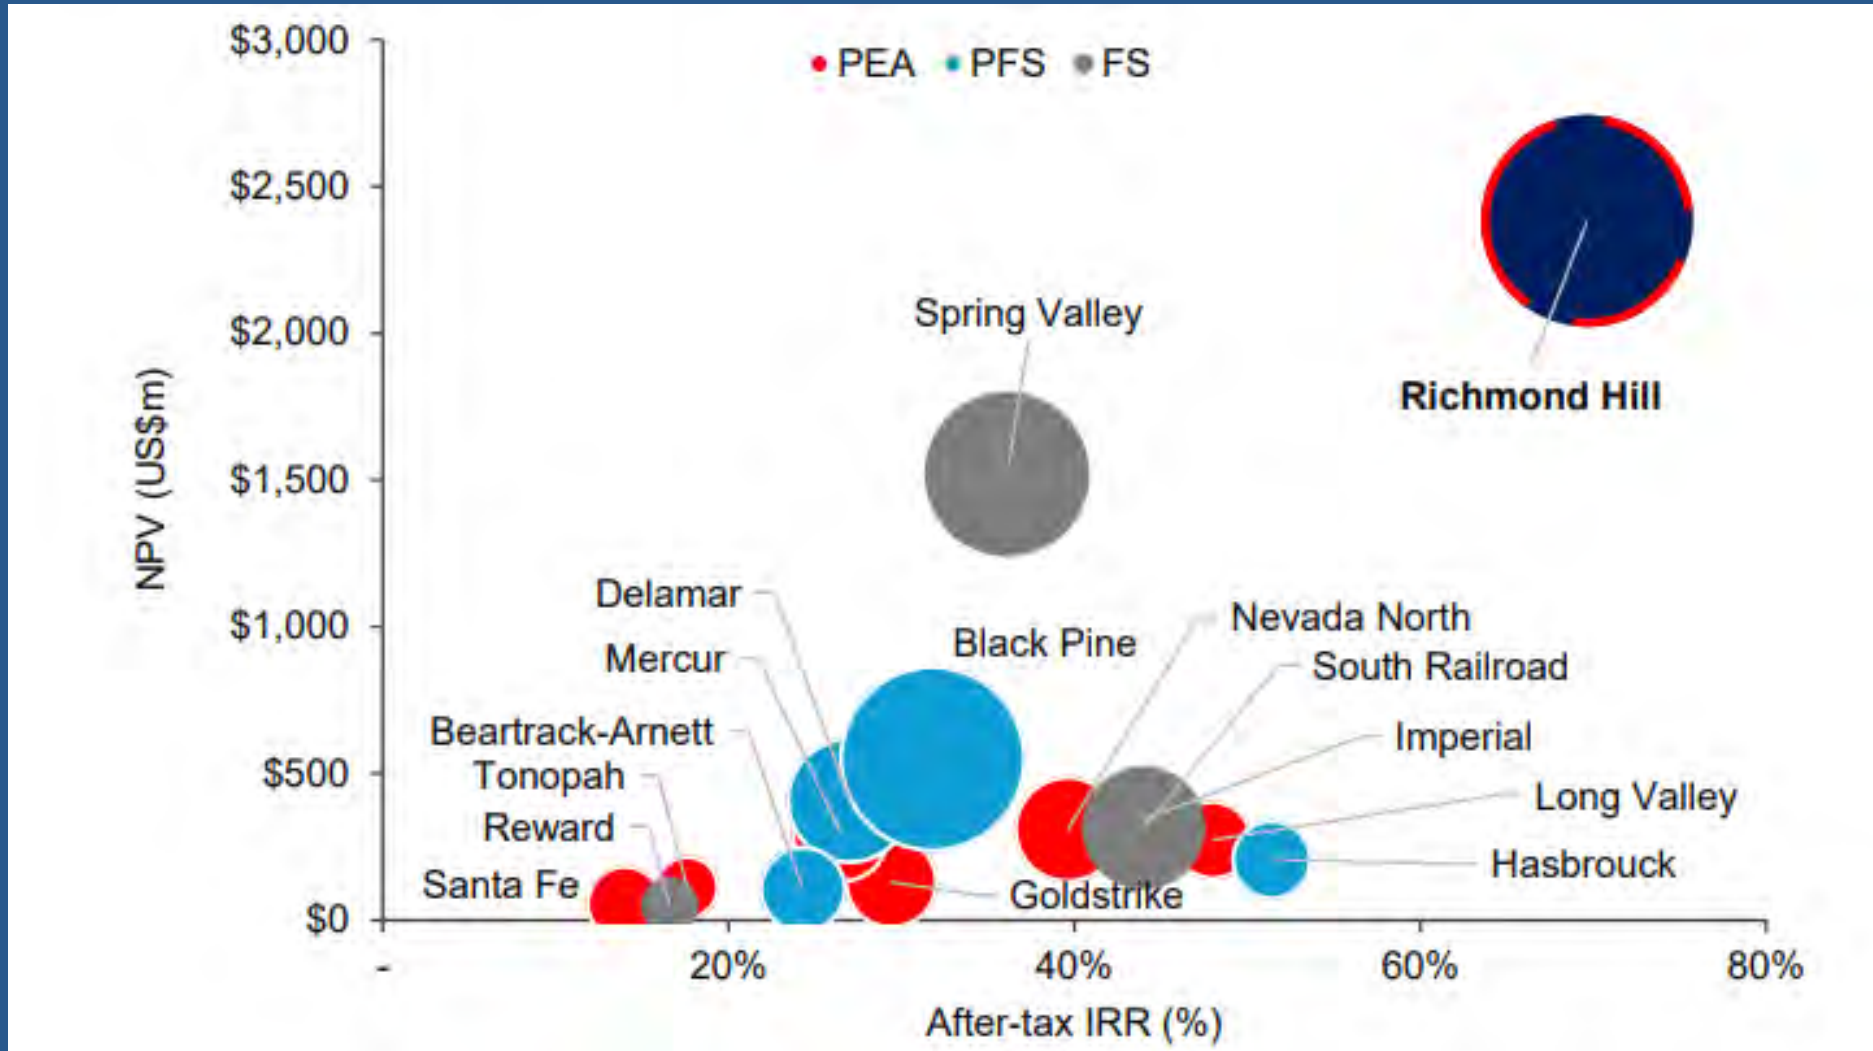

Maitland – Unionville 2026 maiden resource infill drill plan

- 5,578 meters (18,300 feet) infill drill campaign in 44 holes
- Maiden resource year end 2026
- Extensive zone of continuous Tertiary epithermal gold mineralization
- Open in all directions
- Target extension strike extends for at least 2,000 meters (6,562 feet)
- With inclusion of rock chip samples, the total strike length could extend to as much as 3,000 meters (9,843 feet)

NPV, IRR, Resource Size – USA heap leach developers

- Relative positioning - after-tax NPV (\$m) vs after-tax IRR (%) vs heap leachable Au resource (bubble size) of USA heap leach developer peer projects.

Richmond Hill stands out with a significant resource size and an attractive after-tax NPV and IRR

Opportunity for Increased Valuation

- Opportunity for \$EV/oz valuation to increase as Richmond Hill advances through Feasibility Study and into Production.

Developer US\$EV/ Resource oz

Dakota Gold is a Responsible Operator

HEALTH AND SAFETY

- Achieved 5 YEARS with ZERO Lost Time Incidents (2021 to 2025)

ENVIRONMENT

- ZERO Notice of Environmental Violations since commencing drill programs in 2022

COMMUNITY

- More than \$100 Million has been Invested in South Dakota from 2019 to 2024 through payroll, payments to vendors, contractors and purchases on land and buildings

Dr. Stephen O'Rourke
Co-Chair and Director

“Dakota Gold is committed to sustainable development as a core value, as further articulated in our Environmental and Community Relations Policies.”

Directors and Management

~87% of Dakota Gold employees live in South Dakota with 10 South Dakota School of Mines alumni, students or former faculty

BOARD OF DIRECTORS

Robert Quartermain
Co-Chair, Director, and CEO

Past Executive Chairman of Pretium Resources Inc. and CEO of Silver Standard. Inducted to Canadian Mining Hall of Fame in 2022.

Stephen O'Rourke
Co-Chair and Director

Former President of Global Petroleum Exploration for BHP Billiton.

Jennifer Grafton
Director

Serves as the Chief Operating Officer, General Counsel and Secretary of Rare Earths Americas. Previously served as EVP & General Counsel of E2open Parent Holdings Inc.

Brian Iverson
Director

Senior legal and financial executive with more than 30 years of experience in the utility, energy and financial services sectors including two decades with Black Hills Corporation.

Todd Kenner
Director

More than 40 years experience in engineering design and business management. Former CEO of RESPEC from 2009 to 2024.

Kevin Puil
Director

Over 25 years of experience in the resource investment sector. Managing Partner of RIVI Capital LLC, a private equity firm specializing in precious metals.

Alice Schroeder
Director

Serves or has served on numerous public company boards including, Stellantis, Carbon Streaming Corp., Natus Medical Inc., HSBC North America Holdings Inc., and Prudential plc.

MANAGEMENT

Jack Henris
President and COO

More than 35 years of experience in the mining industry. Former COO for Hycroft Mining and held various senior management roles for Newmont Mining, Stantec, Goldcorp and Barrick.

Shawn Campbell
CFO

More than 15 years of experience in project and operations financial management. Former Chief Financial Officer of GT Gold Corp. Experience with both Goldcorp, Newmont and the Wharf Mine.

Amy Koenig
SVP Chief Legal Officer & Corp Secretary

Over 20 years of experience practicing law. Former VP, Governance, Corporate Secretary & Deputy General Counsel for Black Hills Corporation (BHC). Prior to joining BHC, Ms. Koenig was a litigator at Gunderson, Palmer, Nelson & Ashmore LLP.

Mike Eiselein
VP Project Development

34 years' experience in process operations, engineering, and design. Senior operations roles with Barrick, Newmont, McEwen Mining, Teck, and Bunker Hill.

Mark Rantapaa
VP Operations

Over 36 years in mining including 26 years with Barrick Gold Corporation. South Dakota School of Mines and Technology / BS Geological Eng.

Carling Gaze
VP of IR and Corp Communications

Over 15 years experience in resource, former Senior Investor Relations and Corporate Comm's Associate of Pretium Resources Inc.

Elizabeth Sailer
VP, External Relations

Over 20 years of experience in public, governmental and media relations, communications and partnership collaborations throughout South Dakota. South Dakota School of Mines graduate.

Timm Comer
Environmental Director

Three decades of experience in environmental permitting, policy development, and compliance program implementation of mining properties with effective operation, reclamation, and closure focus. Black Hills State University graduate.

Bill Gehlen
Sr. Manager - Geology

Over 40 years of experience in mineral exploration and project evaluation. Former Manager, Corporate Development at Gold Standard Ventures and former Manager, Resource Development with OceanaGold.

Significant Gold Optionality for Shareholders

- **Richmond Hill - S-K 1300 Initial Assessment with Cash Flow outlined 2.6 Moz Au and 8.7 Moz Ag life of mine production with robust economics for the measured and indicated mine plan**
- **Unionville Zone - Tertiary epithermal gold system at Maitland**
- **JB Gold Zone - High-grade banded iron formation gold outlined at Maitland similar to the 6Moz West Ledges at Homestake Mine**

2026 Catalysts

Richmond Hill – Advancing Feasibility and Permitting

- **Pre-Feasibility Study H2 2026**
- **Preliminary and final metallurgical testing results**
- **Infill and expansion drilling**
- **Baseline data collection for permitting**
- **Filing the Notice of Intent**

Maitland Gold

- **Unionville Zone - infill drilling in 2026 and targeting maiden resource Q1 2027**
- **JB Gold Zone - continue to evaluate high-grade optionality opportunities**

APPENDIX

Richmond Hill - IACF M&I plan capital & operating costs details

Capital Cost Items (US\$M)	Initial	Sustaining	LOM
Ore Preparation (Crush, Agglomerate, Stack)	\$83.5	\$0	\$83.5
Heap Leach Pad & Ponds	\$23.3	\$80.7	\$104.0
Merrill Crowe & Refinery	\$22.6	\$0	\$22.6

U.S. Silver production and consumption

Historical U.S. Annual Silver Production ¹

YEARS	TONNES
2020	979
2021	925
2022	916
2023	925
2024	997

U.S. State Estimated Production 2025 ³

STATE	TONNES
Idaho	362
Alaska	272
Nevada	226
Others	181
Total	1,043

- Silver added to the Department of Interior USGS Critical Minerals List on November 6, 2025 ² due to growing federal recognition of its importance to the U.S. economy and national security.
- Current U.S. silver production does not meet domestic consumer demand of 5,805 tonnes in 2024.¹
(Defined as mine production + secondary production + imports – exports ± adjustments for Government and industry stock changes.)
- U.S. highly reliant on imports from other countries to meet demand.¹
- With industrial demand rising rapidly—driven by solar, AI data server centers, electric vehicles, and next-generation electronics—domestic supply remains limited.
